

Supplementary S1: Characteristics of the selected hospitals

Sr. no.	Characteristics	Mayo Hospital	Jinnah Hospital	General Hospital	Services Hospital	Children's Hospital
1	Number of beds	2400	1500	1300	1196	1100
2	Inpatients visit last year	343,114	217,245	134,491	125,868	151,736
3	Prescribers/Medical officers	550	348	300	274	252
4	Pharmacists/Dispensers	30	29	16	14	22
5	Nurses	500	313	271	249	229
6	Other Paramedical staff *	4000	2500	2167	1993	1832

* Other Paramedical staff includes; medical technicians, ward boys, and sweepers.

Supplementary S2: Selection of Study Population

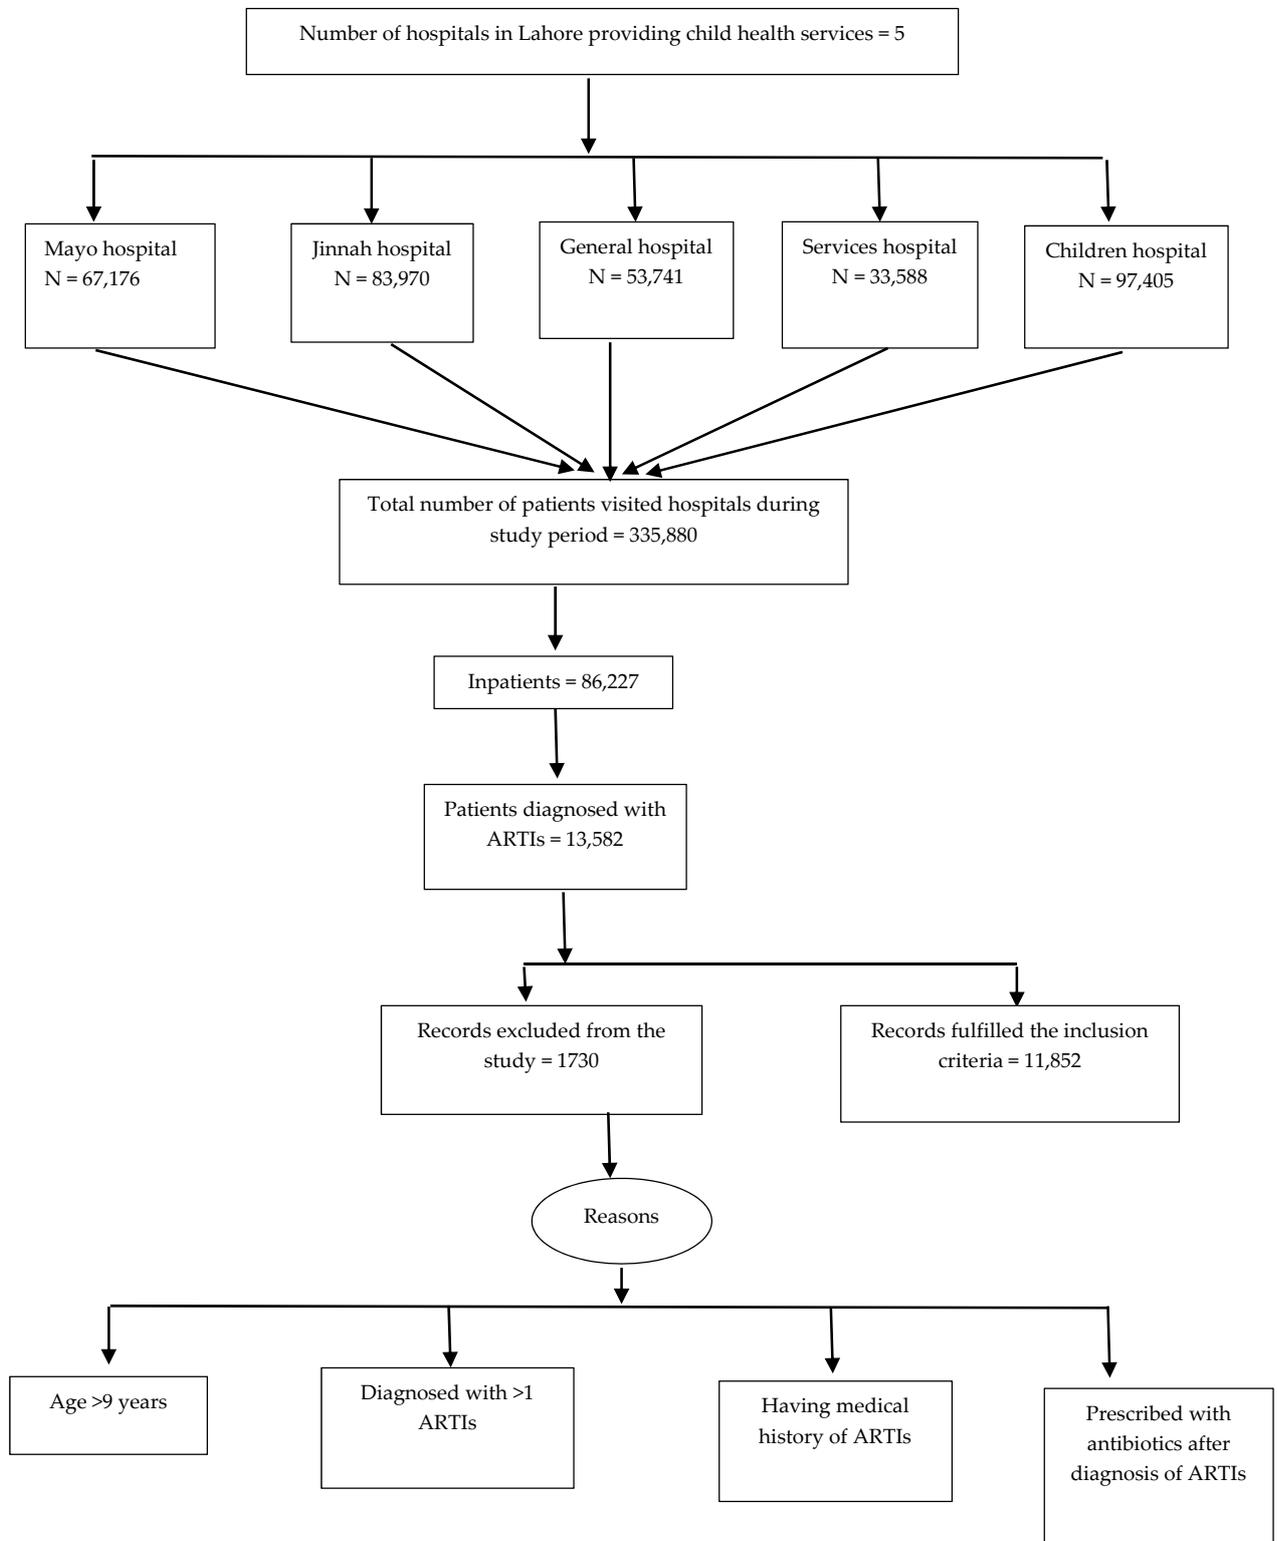

Figure 1: Selection of Study Population

Supplementary S3: Questionnaire of the study

Section 1: General information

Name of patient _____ Age (years) _____
Date of hospitalization _____ Weight (Kg) _____
Date of discharge _____ Gender _____
Length of Stay (LOS) (in days) _____
Height of patient (cm) _____
Hospital and ward _____
Name of investigator(s) _____
Name of attending physician _____
Name of clinical pharmacist _____

Section 2: Patient's lab test results and Differential diagnosis

What were the results of patient's lab test reports,
Total leucocyte count (TLC) (cells/ μ L) _____
Erythrocytes count (cells/ μ L) _____
Platelet count (cells/ μ L) _____
Rapid Strep A (RSA) antigen detection test _____
Throat swab culture test _____
Respiratory viral panel test _____
Other microbial/bacterial culture test _____

What guidelines were being obeyed for diagnosis of ARTIs in the hospital?

According to ICPC-2, Patient was suffering from which type of ARTI?

Section 3: Patient's medication information

What guidelines were being obeyed or followed in the hospital for prescribing of antibiotics?

What antibiotics were prescribed on the basis of differential diagnosis?

Dose _____ Dosage form _____ Route _____ Frequency _____
Duration _____

Antibiotics belong to which class?

Penicillins	<input type="checkbox"/>	Macrolides	<input type="checkbox"/>	Cephalosporins	<input type="checkbox"/>
Fluoroquinolones	<input type="checkbox"/>	Aminoglycosides	<input type="checkbox"/>	Glycopeptide	<input type="checkbox"/>
Lincosamide	<input type="checkbox"/>	Carbapenem	<input type="checkbox"/>	Oxazolidones	<input type="checkbox"/>

Was the prescribed antibiotic therapy in accordance with the guidelines?

Yes No

In what ways was the prescribed antibiotic regimen differ from the guidelines?

Drug selection Dose Route Frequency
Duration

Section 4: Prescribing errors

Is there any prescribing error found?

Yes No

How many prescribing errors were found in the record?

One Two Three or more

Categorization of prescribing errors

(Check all that apply)

- Order written on wrong patient
- Order written for wrong drug
 - Drug was inappropriate for indication
 - Patient was allergic to drug
 - Drug-drug or drug-disease interactions
- Order written for wrong dose or dose was not adjusted
 - Under dose
 - Over dose

Order written for wrong dosing schedule or duration

Order written for wrong route

Order written for wrong frequency

High frequency

Low frequency

Duplication of therapy

Supplementary S4: Definitions of different terms

Terms	Definitions/Criteria
Inpatients	Those who acquired bed in hospital and admitted for >24 hours.
Child	A patient whose age is ≤ 18 years of age.
Length of stay (LOS)	The duration of a single episode of hospitalization.
Short LOS	If the patient stays is <5 days in the healthcare setting.
Long LOS	If the patient stays is ≥ 5 days in the healthcare setting.
Wrong drug	Occur when the drug is inappropriate to the patient's medical condition.
Wrong dose	Prescribed dose was $\pm 10\%$ of the recommended dose in the guidelines.
Wrong route	Prescribed drug was administered other than the recommended route by the guidelines.
Wrong frequency	When the prescribed frequency of antibiotics is different from the guidelines.
Wrong duration	When duration of prescribed antibiotics is different from the guidelines e.g., amoxicillin for 7 weeks instead of 7 days.
Duplicate therapy	When multiple antibiotics are prescribed for the same indication without a clear distinction of when one agent should be administered over another

Supplementary S5: Antibiotics prescribed among study population with long length of stay in hospital

Disease	Long LOS* (6285)		Prescribed Antibiotics	Prescribe d Dose	Prescribed Route	Prescribed Duration	Prescribed Frequency	N (%)
