Data organization of BMD:

1.2.3 Table S3. BMD Excluded studies and reasons

| Reasons for exclusion: | Amount | Reference No. |
|--|--------|---------------|
| Only abstract available or cannot gain the full content of study | 5 | 1–5 |
| Insufficient data for analysis | 19 | 6–24 |
| BMD measurement not using DXA | 10 | 25–34 |
| Grouping mismatching criteria(no exact grouping based on different levels of coffee/tea consumption) | 2 | 35,36 |
| Analysis data of dietary consumption only including caffeine (no discrimination between coffee/tea and other caffeinated drinks or other food) | 8 | 37–44 |
| Outcome mismatching criteria(no exact BMD data for different consumption groups) | 19 | 45–63 |
| Only including specific population | 1 | 64 |

Supplementary Material

| | | |
|---|---|-------|
| Cutoff point being too inconsistent to be organized within selected studies | 3 | 65–67 |
|---|---|-------|

Data organization of fracture:

1.2.4 Table S4. Fracture excluded studies and reasons

| Reasons for exclusion: | Amount | Reference No. |
|--|--------|---------------|
| Insufficient data for analysis | 1 | 68 |
| Grouping mismatching criteria(no exact grouping based on different levels of coffee/tea consumption) | 4 | 69–72 |
| Analysis data of dietary consumption only including caffeine (no discrimination between coffee/tea and other caffeinated drinks or other food) | 2 | 73,74 |
| Outcome mismatching criteria(results of study without hazard ratio, cannot converted to hazard ratio, or no recording fractures of hip) | 16 | 21,75–89 |
| Cutoff point being too inconsistent to be organized within selected studies | 2 | 90,91 |

1.2.5 Table S5. Quality assessment of cohort studies using NOS

| Article | Representativeness of the exposed cohort | Selection of the non exposed cohort | Ascertainment of exposure | Demonstration that outcome of interest was not present at start of study | Comparability of cohorts on the basis of the design or analysis | Assessment of outcome | Was follow-up long enough for outcomes to occur | Adequacy of follow up of cohorts | Total score |
|--------------------|--|-------------------------------------|---------------------------|--|---|-----------------------|---|----------------------------------|-------------|
| Hallström, H. 2010 | * | * | NO | NO | ** | * | * | NO | 6 |
| Huang, H.2018 | * | * | * | * | ** | * | * | NO | 8 |
