x = exam that the variable was measured; o = exam that the variable was imputed (carried forward or, in the case of parental education, backward from a previous measure); dash (-) indicates that the variable was not measured or imputed for that exam.

^a Blood pressure was measured at alternating exam dates (during the face-to-face exam only) for HRS participants. Exam 1 indicates the first exam at which blood pressure was measured (2006, 2008, or 2010).

^b Number of chronic burdens was not measured in HRS in 2008.
