Table S1. *Cont.*

Exurb	ZX27	121.3208333	29.7844444
Exurb	ZX28	121.3008333	29.8183333
Exurb	ZX29	121.2919444	29.8166667
Exurb	ZX30	121.2655556	29.8430556

Table S2. Operational parameters of the analysis by ICP-MS

Parameters	Value
RF power (W)	1550
Nebulizer gas flow (L min ⁻¹)	1.04
Auxiliary gas flow (L min ⁻¹)	0.8
Cooling gas flow (L min ⁻¹)	14
Extraction Lens 2 (V)	-106.7
CCT Focus Lens (V)	-11.40
Sampling cone (mm)	1.0, Ni cone
Skimmer cone (mm)	0.5, Ni cone
Isotopes monitored	52Cr, 60Ni, 63Cu, 66Zn, 75As, 11Cd, 121Sb, 208Pb
Dwell time (ms)	30
Acquisition mode	Peak jumping
Collision gas (He, mL min ⁻¹)	4.153
Resolution	Normal

Table S3. Background values (mg/kg) of eight heavy metals in Ningbo City in 1990

Element	Number	Order statistics					Arithmetic mean	SD
		Minimum	0.25	Median	0.0075	Maximum		
Cr	82	10.800	37.300	63.300	77.100	190.400	62.100	28.470
Ni	81	15.200	23.400	35.400	39.800	50.700	32.600	9.390
Cu	82	3.200	10.300	23.500	28.000	59.900	21.100	10.870
Zn	82	28.500	67.100	82.100	111.000	344.000	99.800	56.980
As	82	1.400	5.000	6.850	9.000	19.100	7.200	3.130
Cd	82	0.010	0.067	0.112	0.156	0.427	0.123	0.070
Sb	17	0.610	0.780	0.910	1.030	1.480	0.920	0.203
Pb	82	12.900	21.750	27.000	31.750	80.200	28.100	10.140

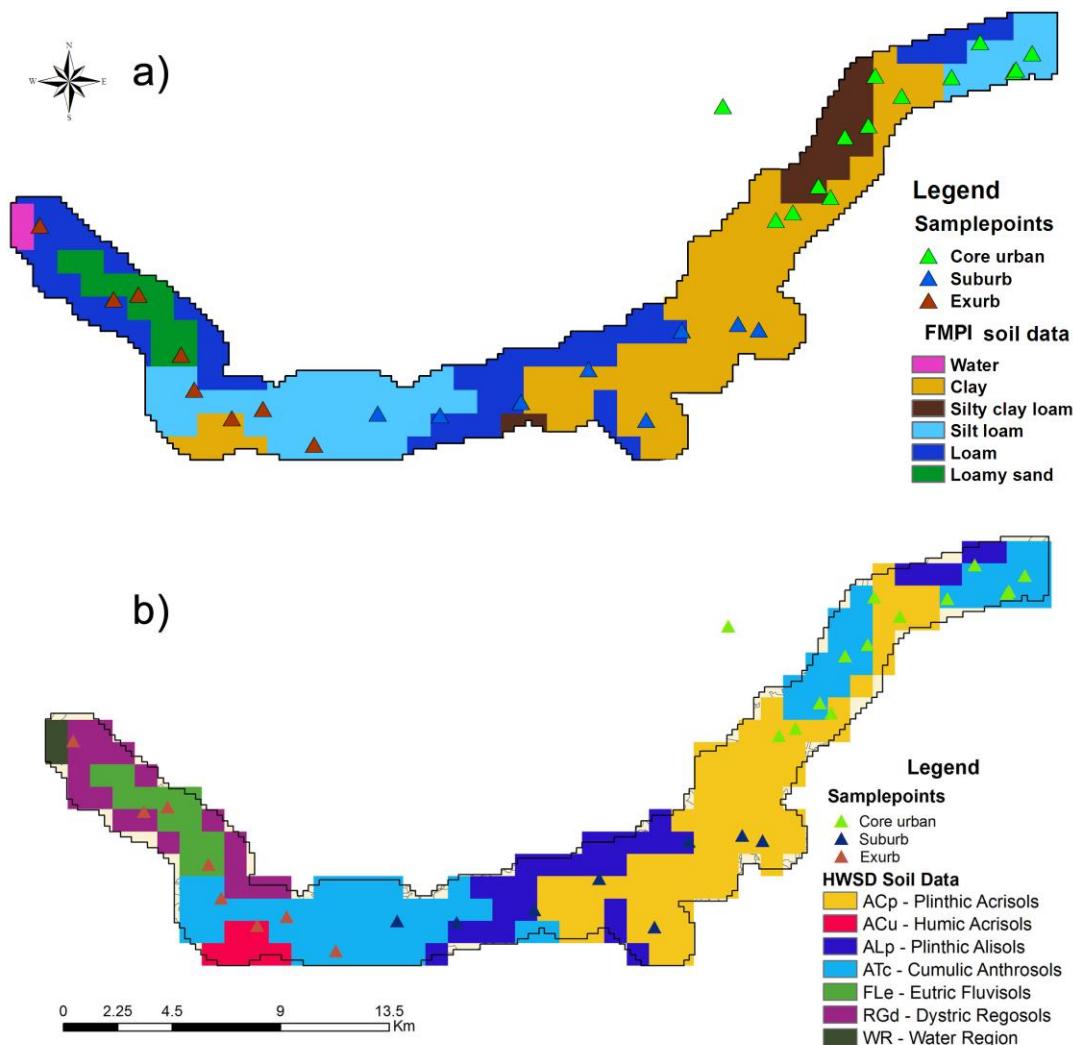

Figure S1. The FMPI soil texture and Food and Agriculture Organization (FAO90) soil type from Harmonized World Soil Database, HWSD in study area. HWSD Sources: Fischer, G.; F. Nachtergaele, S. Prieler, H.T. van Velthuizen, L. Verelst, D. Wiberg, check names 2008. Global Agro-ecological Zones Assessment for Agriculture (GAEZ 2008). IIASA, Laxenburg, Austria and FAO, Rome, Italy.

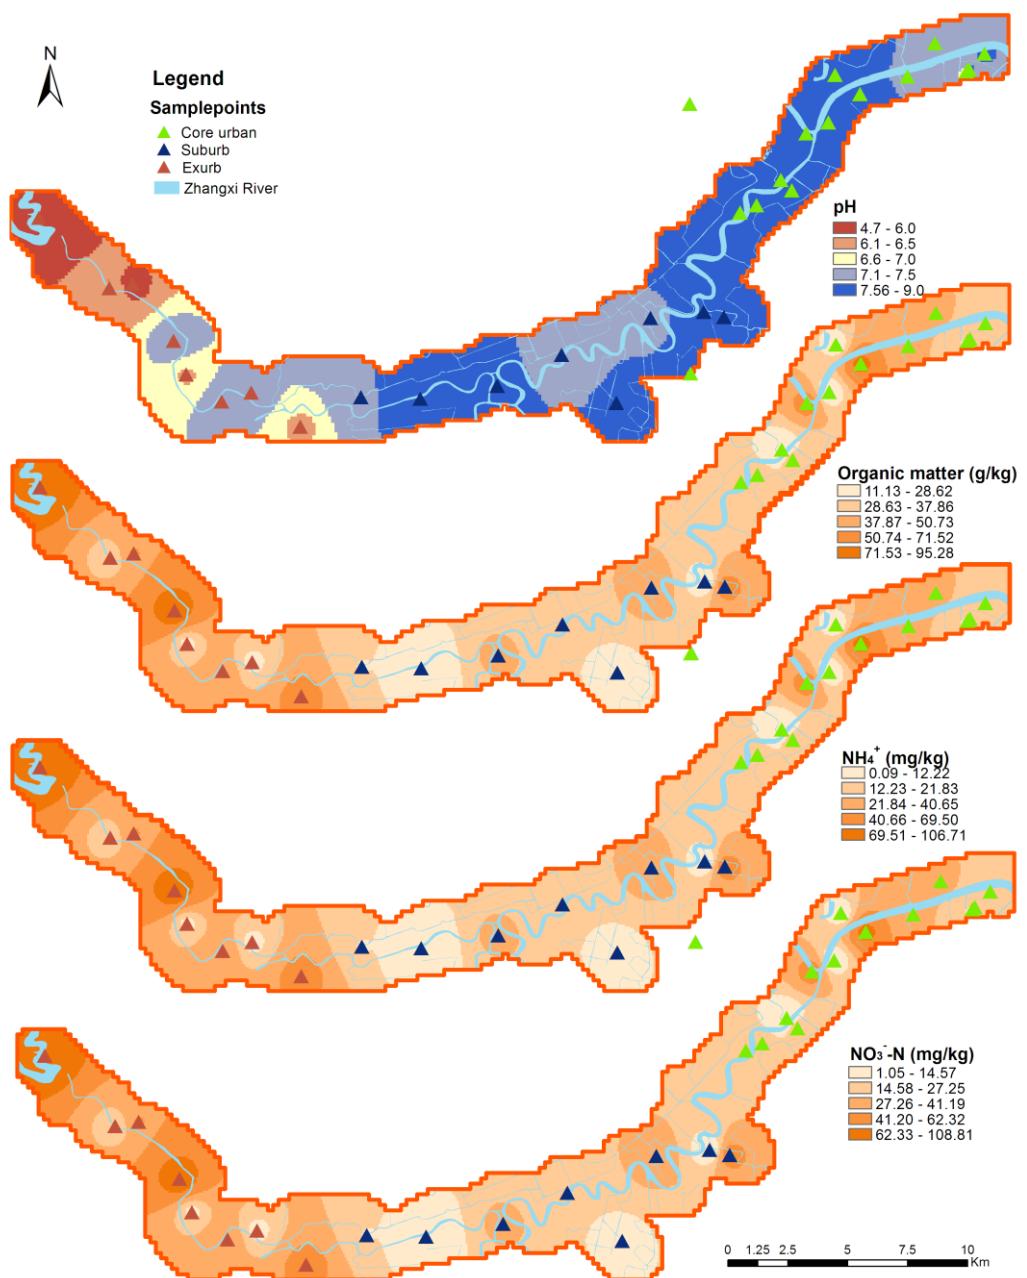

Figure S2. The spatial distributions of pH, organic matter, NH_4^+ and NO_3^- -N during the urbanization gradients

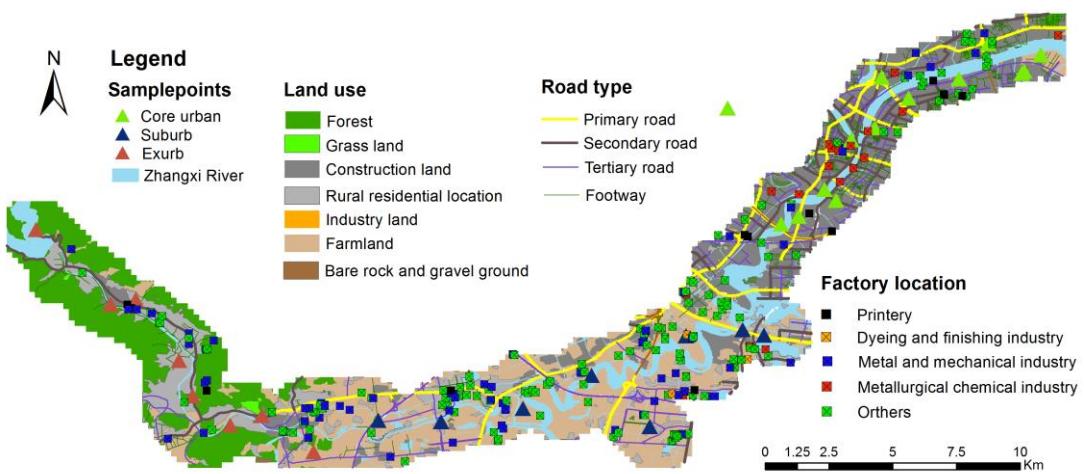

Figure S3. Land use, road network and factory locations in the study area
