Table S5. Matrix of the exposure assessment.

Exposure	Cyclone		Flood	Drought
	Frequency from 2006 to 2014 (9 years, 24 cyclones)	Frequency from 1975 to 2014 (26 episodes)	Frequency from 1981 - 2014 (9 episodes)	Frequency of 1981 - 2014 (9 episodes)
Very strong	Frequency > 8	Frequency > 13	Frequency > 8	Frequency > 8
Strong	Frequency from 5 to 8	Frequency from 5 to 13	Frequency from 5 to 8	Frequency from 5 to 8
Average	Frequency from 3 to 5	Frequency from 1 to 5	Frequency from 1 to 5	Frequency from 1 to 5
Low	Frequency of cyclone < 3	Frequency = 0	Fréquency = 0	Fréquency = 0

Table S6. Matrix of sensitivity assessment.

Sensitivity	Economic characteristics	Accessibility to health center(HC)	Characteristics of the habitat	Demographic, health and communication conditions
Very strong	Poverty rate > 80% or Percentage of active men working in agriculture > 80%	Accessibility rate in WASH infrastructure <20% Or percentage of households making a journey of more than one hour to reach, from the town center, the nearest HC > 80%	Percentage of habitats with non-solid wall > 80%	Density of the population > 100 inhabitants / km ² Prevalence ARI in children under 5 > 20% Immunization rate of children aged 12 - 23 months <40% Percentage of children aged 12 to 23 months with acute malnutrition > 10%
Strong	Poverty rate of 75 to 80% or Living percentage of natural resources 75% to 80%	Accessibility rate in WASH infrastructure from 20 to 40% Or households making a journey more than one hour to reach, from the town center, the nearest HC	Percentage of dwellings in non-solid materials 60 to 80% Hazardous area (coastal, flood, arid, altitude > 800m - plague)	Density of the population from 50 to 100 inhabitants / km ² Prevalence ARI in children under 5 years of age from 15 to 20% Immunization rate of children from 12 to 23 months from 40 to 60% Percentage of children aged 12 to 23 months with acute malnutrition from 8.6% to 7%

Sensitivity	Economic characteristics	Accessibility to health center(HC)	Characteristics of the habitat	Demographic, health and communication conditions
		nearest HC 60 to 80%		
Average	Poverty rate of 65 to 75% or Percentage living of natural resources from 65% to 75%	Accessibility rate in WASH infrastructure from 40 to 60% Or percentage of population living more than 10km from 40 to 60% HC	Percentage of dwellings in non-solid materials from 40 to 60% Hazardous area (coastal, flood, arid, altitude> 800m - plague)	Density of the population from 25 to 50hab / km ² Prevalence IRA in children under 5 years of age from 10 to 15% Immunization rate of children from 12 to 23 months from 60 to 80% Percentage of children aged 12 to 23 months with acute malnutrition 5% to 7%
Low	Poverty rate of <65% or Living percentage of natural resources <65%	Percentage of households who hygienically remove stool from their children> 60% Or households making a journey more than one hour to reach, from the town center, the nearest HC<40%	Percentage of dwellings in non-solid materials <40% Hazardous area (coastal, flood, arid, altitude <800m - plague)	Density of the population of <25 inhabitants / km ² Prevalence IRA in children <5 years <10% Immunization rate of children from 12 - 23 months> 80% Percentage of children aged 12 to 23 months with acute malnutrition <5%

Table S7. Matrix of adaptive capacity assessment.

Adaptability	Health system	Community	Household
Verystrong	Physician ratio per 10,000 population> 1 Ratio of inhabitants per health facility <10,000	Lightweight car accessibility coverage rate permanently 100%	Literacy rate of individuals over 15 years> 80% Non-farm business ownership rate> 50% Average annual salary income> 2,000,000 Ar
Strong	Physician ratio per 10,000 inhabitants: 0.5 to 1 Ratio of inhabitants per health facility from 10,000 to 15,000	Coverage rate of communes in communication (mobile phone, Madagascar National Radio Channel(MNR,) light car	Literacy rate of individuals over 15 years of age from 70% to 80% Non-farm business ownership rate from 30% to 50% Average annual salary income from Ar 1,500,000 to Ar 2,000,000

	Adaptability	Health system	Community	Household
	accessibility permanently) from 75 to 100%			
Average	Physician ratio per 10,000 inhabitants: 0.3 to 0.5 Ratio of inhabitants per health facility from 15,000 to 20,000	Municipal coverage rate in communication (mobile phone, MNR, light car accessibility permanently) from 50 to 75%	Literacy rate of individuals over 15 years of age from 50% to 70% Non-farm business ownership rate from 25% to 30% Average annual salary income from 1,200,000 Ar to 1,500,000 Ar	
Low	Physician ratio per 10,000 population <0.3 Population ratio per health facility > 20,000	Communal coverage rate in communication (mobile phone, MNR, light car accessibility permanently) <50%	Literacy rate of individuals over 15 <50% Non-farm business ownership rate <25% Average annual salary income <1,200,000 Ar (SMIG)
