We wish to update Section 2.3 (Data Collection) in our paper published in the *International Journal of Environmental Research and Public Health* (*IJERPH*) [1]. In the beginning of the first paragraph in the data collection section, we would like to add the following sentence: With inspiration from an unpublished manuscript by Lögdberg et al., the photovoice method was developed through discussions in the research team, and through a review of relevant literature [2,3]. The changes do not affect the results. The manuscript will be updated and the original will remain online on the article webpage with a reference to this addendum.
