

Supplementary materials

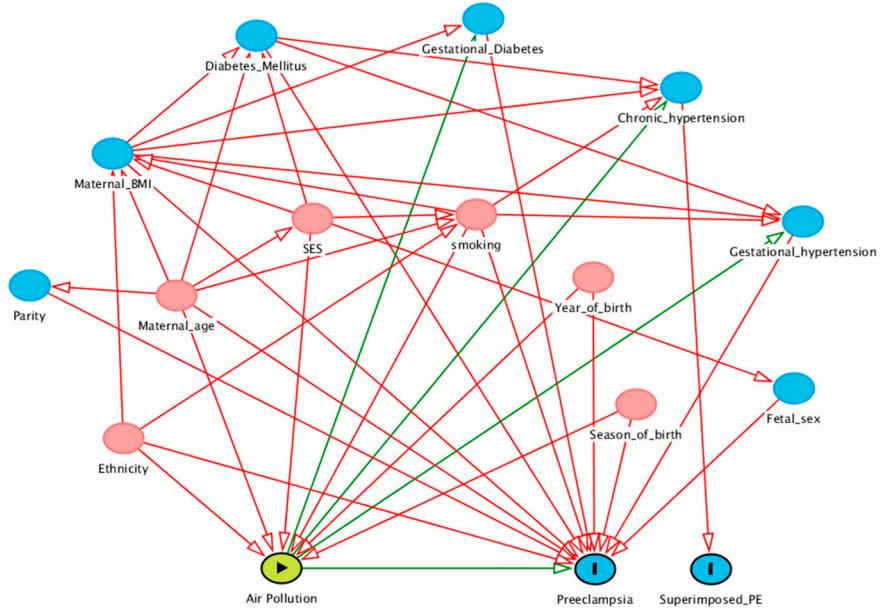

Figure S1. Directed Acyclic Graphs to guide the selection of potential confounders for the association between the ambient air pollution and preeclampsia: (yellow) exposure; (blue with l) outcome; (red dot) common cause; (blue dot) ancestor.

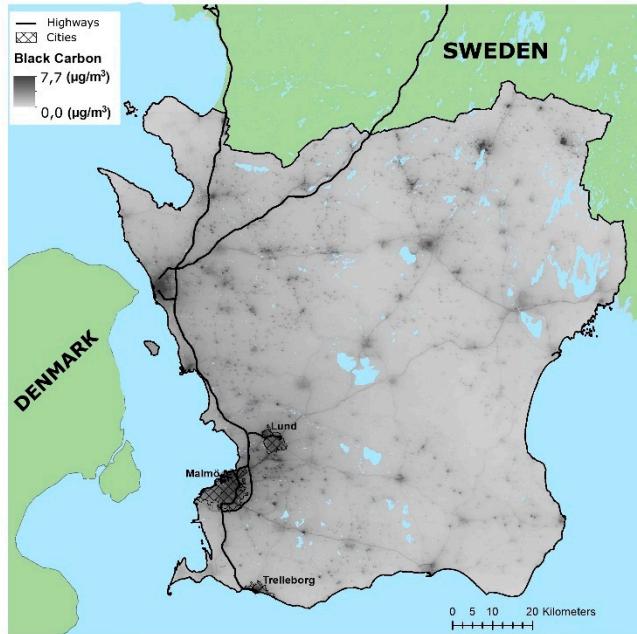

Figure S2. Local black carbon (BC) dispersion modeling in Scania, Sweden in January 2006. Map by Emilie Stroh.

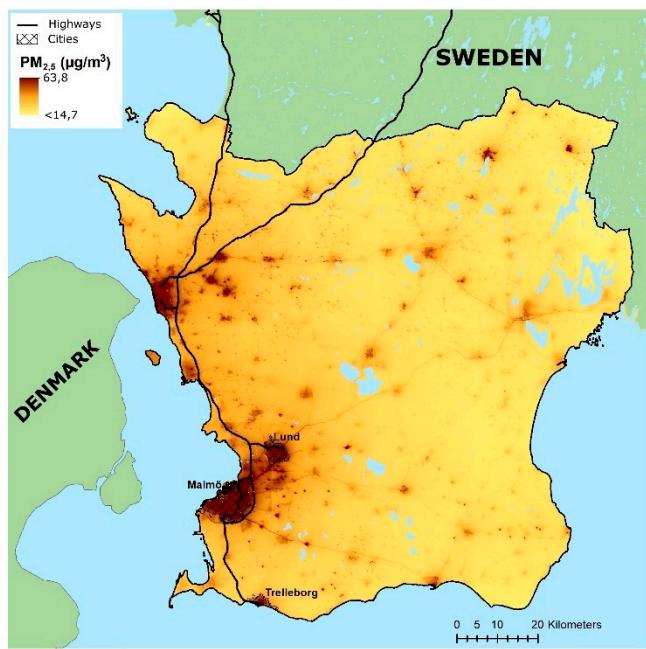

Figure S3. Local PM_{2.5} dispersion modeling in Scania, Sweden in January 2006. Map by Emilie Stroh.

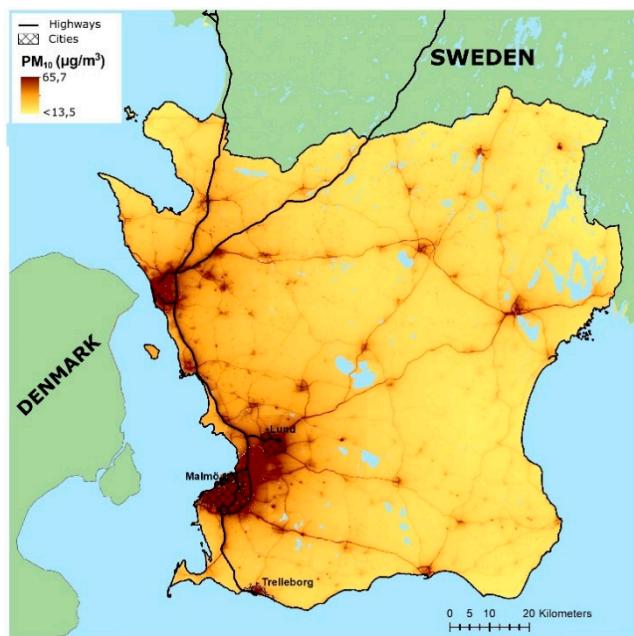

Figure S4. Local PM₁₀ dispersion modeling in Scania, Sweden in January 2006. Map by Emilie Stroh.

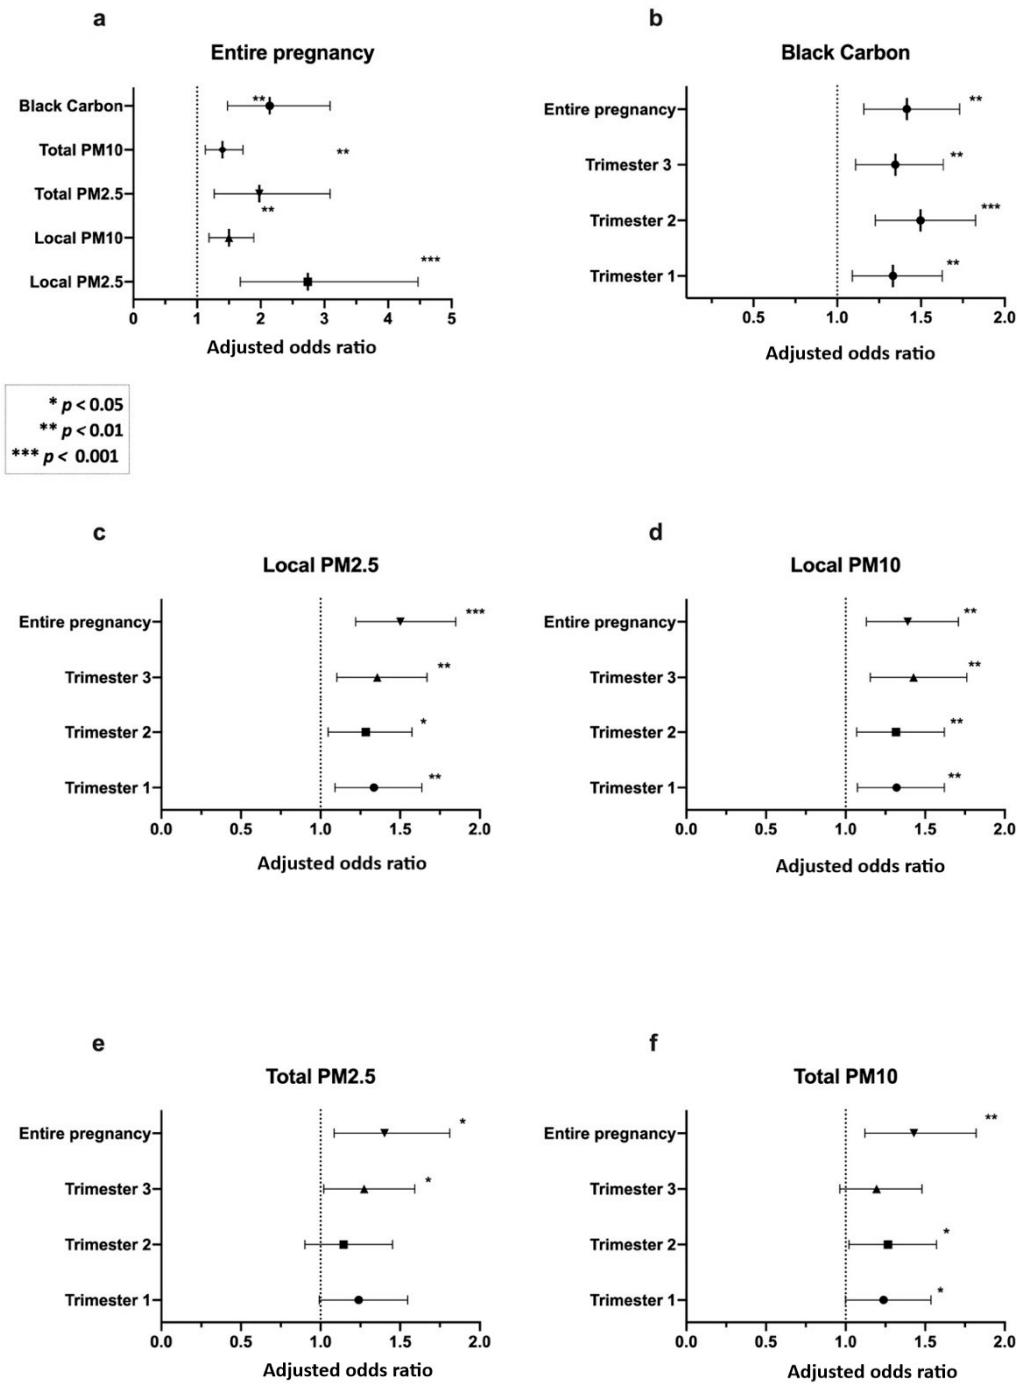

Figure S5. Graphic illustration of adjusted analysis of all particles. (a) Linear exposure trend in whole pregnancy. (b) Adjusted Odds Ratios (AORs) for PE at the highest quartiles of black carbon exposure in all exposure windows. (c) AORs for PE at the highest quartiles of local PM_{2.5} exposure in all exposure windows. (d) AORs for PE at the highest quartiles of local PM₁₀ exposure in all exposure windows. (e) AORs for PE at the highest quartiles of total PM_{2.5} exposure in all exposure windows. (f) AORs for PE at the highest quartiles of total PM₁₀ exposure in all exposure windows. p-values for (a) as compared to the healthy controls and for (b), (c), (d), (e) and (f) as compared to the lowest quartiles in each specific exposure windows.

Table S1. Pearson's correlations among pollutants ($\mu\text{g}/\text{m}^3$) in Scania, Sweden over the 2000–2009 period.

	NO _x	Local PM _{2.5}	Local PM ₁₀	BC	Total PM _{2.5}	Total PM ₁₀
