

Supplementary material

Supplementary Table S1. Regression coefficients for background variables in mediation model.

| | Lack of competence and logistics | | | Lack of time and interest | | | Insecurity and fear | | | Frequency of adult-child nature visits | | |
|---------------------------------------|----------------------------------|------|----------------|---------------------------------|------|----------------|---------------------------------|------|----------------|--|------|----------------|
| | Unstandardized coefficients (B) | SE | <i>p-value</i> | Unstandardized coefficients (B) | SE | <i>p-value</i> | Unstandardized coefficients (B) | SE | <i>p-value</i> | Unstandardized coefficients (B) | SE | <i>p-value</i> |
| Child age | -0.02 | 0.01 | <0.01 | 0.02 | 0.01 | <0.01 | -0.01 | 0.01 | <0.05 | -0.06 | 0.02 | <0.01 |
| Parental educational attainment | -0.01 | 0.01 | 0.60 | 0.05 | 0.01 | <0.01 | -0.02 | 0.01 | 0.18 | -0.10 | 0.04 | <0.05 |
| Parents' perceived economic situation | -0.04 | 0.01 | <0.01 | -0.03 | 0.01 | <0.01 | -0.03 | 0.01 | <0.01 | 0.01 | 0.04 | 0.84 |
| Household type ^I | 0.08 | 0.03 | <0.01 | 0.03 | 0.03 | 0.30 | -0.01 | 0.03 | 0.75 | -0.16 | 0.10 | 0.10 |

Note. Key and background variables included in same model.

^I Household type (two-parent household = 1, single-parent household = 2).
