

Table S1. Comparison Measures

Name	Domain	Longitudinal survey	Number of items	Scoring/interpretation	Validation (if applicable)
Mainous Trust in Medical Researchers [10]	Trust in medical researchers	1	12	Score ranging from 0 to 48; higher values indicate higher trust	Cronbach's alpha = 0.84
Hall Trust in Medical Researchers [11]	Trust in medical researchers	1	12	Score ranging from 0 to 100; higher values indicate higher trust	Cronbach's alpha = 0.87. Factor model consists of 1 factor.
Survey of community engagement [12]	Community engagement	1	3 categories; 25 items	Average score ranging from 1 to 7; higher scores indicate higher engagement	n/a
Partnership Assessment In community-based Research (PAIR) [13]	Evaluates key dimensions of researchers and community member partnerships	1	5 dimensions; 31 items	Average score ranging from 1 to 5; higher scores indicate higher engagement	Content validation (literature review, experts, cognitive interviews)
Community Engagement Research Index (CERI) [14]	Community engagement in research	2	12	Sum score ranging from 4 to 12; higher scores indicate	Face validity (items identified by interview participants), content

Table S1. Comparison Measures

Name	Domain	Longitudinal survey	Number of items	Scoring/interpretation	Validation (if applicable)
				higher engagement	validity (items based on previously collected qualitative data)
Coalition Self-Assessment Survey (CSAS) trust sub-scale	Trust within coalition	2	7	Average score ranging from 1 to 4; higher scores indicate higher trust	No validation data, but used across several projects
The Community Campus Partnerships for Health (CCPH) principles	Community campus partnerships	2	10 principles; 47 items		No validation data, but used across several projects
Partnership Self-Assessment Tool (PSAT) – Synergy	Partnership synergy	3	9	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate higher synergy	According to the National Collaborating Centre for Methods and Tools (NCCMT), the PSAT tool has been evaluated, validity properties meet accepted standards,
Partnership Self-Assessment Tool (PSAT) – Leadership	Partnership leadership	3	11	Average score ranging from 1 to 5, rounded to 0.1; higher scores	

Table S1. Comparison Measures

Name	Domain	Longitudinal survey	Number of items	Scoring/interpretation	Validation (if applicable)
				indicate better leadership	and reliability properties meet accepted standards. They gave the tool a 'strong' methodological rating.
Partnership Self-Assessment Tool (PSAT) – Efficiency	Partnership Efficiency	3	3	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate better efficiency	
Partnership Self-Assessment Tool (PSAT) – Administration/Management	Partnership administration/management	3	9	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate better administration/management	
Partnership Self-Assessment Tool (PSAT) – nonfinancial resources	Partnership nonfinancial resources	3	6	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate has resources	
Partnership Self-Assessment Tool (PSAT) other	Partnership financial other	3	3	Average score ranging from 1 to 5, rounded to	

Table S1. Comparison Measures

Name	Domain	Longitudinal survey	Number of items	Scoring/interpretation	Validation (if applicable)
– financial other capital resources	capital resources			0.1; higher scores indicate has resources	
Partnership Self- Assessment Tool (PSAT) – decision making	Partnership decision making	3	3	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate better decision making	
Partnership Self- Assessment Tool (PSAT) – benefits	Partnership benefits	3	11	Percentage score (out of nonmissing items); higher score indicates more benefits	
Partnership self- assessment tool (PSAT) – Drawbacks	Partnership drawbacks	3	6	Percentage score (out of nonmissing items); higher score indicates more drawbacks	
Partnership Self- Assessment Tool (PSAT) – comparing	Comparing benefits and drawbacks	3	1	1='Drawbacks greatly exceed the benefits' to 5='Benefits greatly exceed the drawbacks'	

Table S1. Comparison Measures

Name	Domain	Longitudinal survey	Number of items	Scoring/interpretation	Validation (if applicable)
benefits and drawbacks					
Partnership Self-Assessment Tool (PSAT) – satisfaction	Partnership satisfaction	3	5	Average score ranging from 1 to 5, rounded to 0.1; higher scores indicate higher satisfaction	
Wilder Collaboration Factors Inventory	Collaboration evaluation	3	6 dimensions, 20 factors, 40 items	Average score ranging from 1 to 5 with dimensions equally weighted; higher scores indicate higher collaboration	Reliability varied for dimensions (alpha 0.50 – 0.93) [19]

Table S2. Factor Analysis Results – Comprehensive Version of REST

Item Number	Item	Quantity (n=234)				Quality (n=224)	
		F1	F2	F3	F4	F1	F2
1.1	The focus is on problems important to the community.						X
1.2	All partners look at the data to determine the health problems the community thinks are important.	X				X	
1.3	The effort incorporates factors (for example housing, transportation, food access, education, employment) that influence health status.				X		X
1.4	The focus is on cultural factors that influence health behaviors.				X		X
2.1	All partners have the opportunity to share ideas, input, and leadership responsibilities and to share in the determination of the project structure.	X				X	X
2.2	Plans are developed and adjusted to meet the needs and concerns of the community or patient population.				X	X	X
2.3	All partners agree to take on specific tasks according to their comfort, ability, and expertise.	X				X	
2.4	All partners assist in establishing roles and related responsibilities for the partnership.	X				X	
3.1	All partners share updates, progress, strategies, and new ideas regularly.	X				X	
3.2	A plan is in place for ongoing problem-solving.	X				X	
3.3	All partners are involved in determining next steps.	X				X	
3.4	Community-engaged activities are continued until the goals (as agreed upon by all partners) are achieved.	X				X
