Table S1. Recommendations of the SHAMISEN-SINGS project on the design of applications for health and well-being in a nuclear accident [5].

No.	Recommendations
1	Optimize content with stakeholders
2	Balance content, security, and development cost
3	Develop a user support system
4	Apply incentives to promote usage
5	Respond to queries about radiation and health
6	Involve vulnerable populations
7	Accommodate multiple languages
8	Consider ethical issues, especially privacy protection
