

Supplementary Material of paper entitled:

Predictors of lung cancer risk: an ecological study using mortality and environmental data by municipalities in Italy

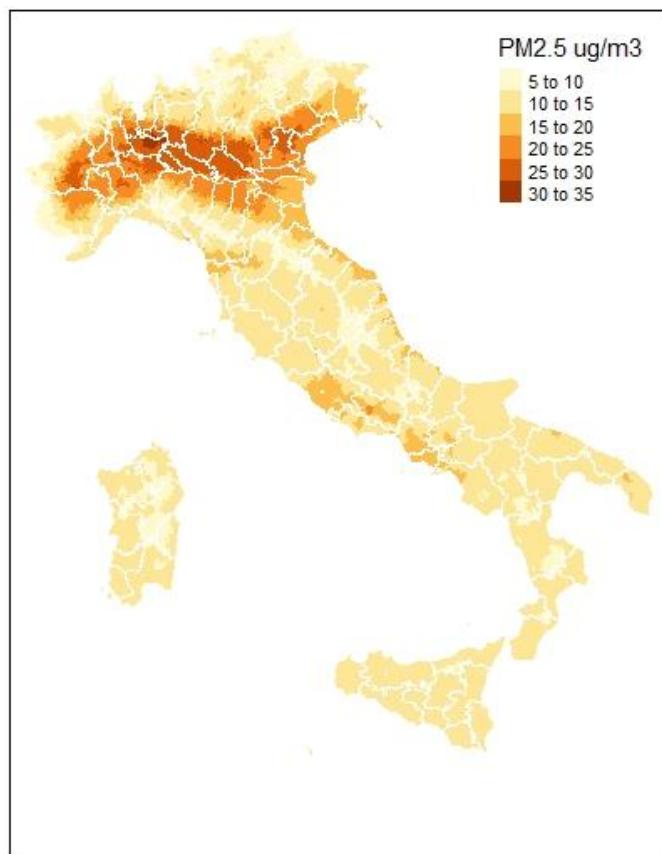

Figure S1. Mean concentration of PM_{2.5}. Provinces borders are shown as white lines. 2006-2015 data.

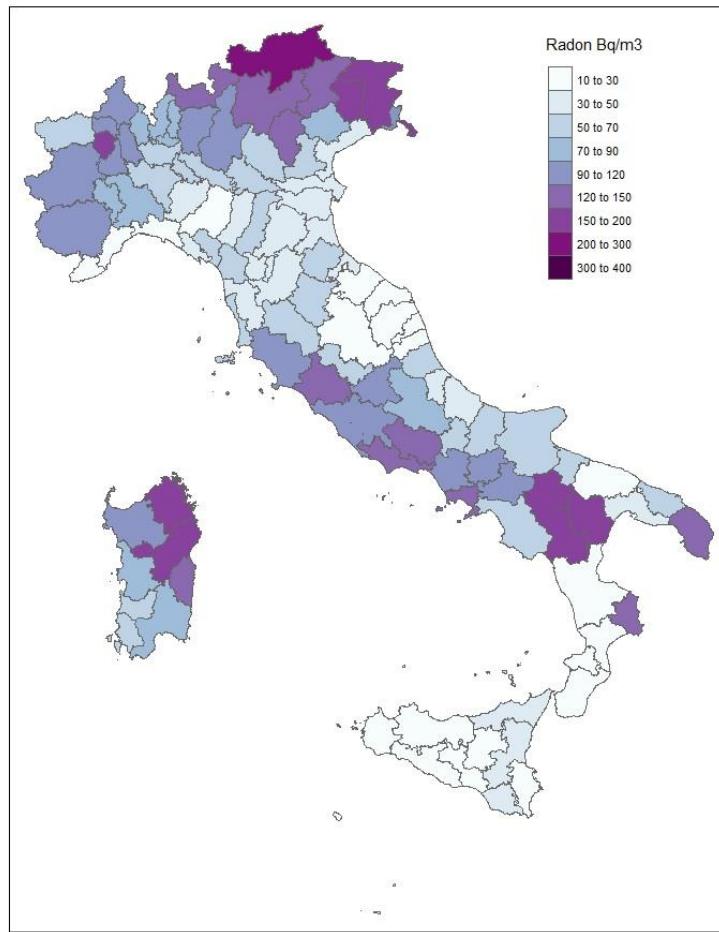

Figure S2. Mean concentration of Radon. Provinces borders are shown as black lines.

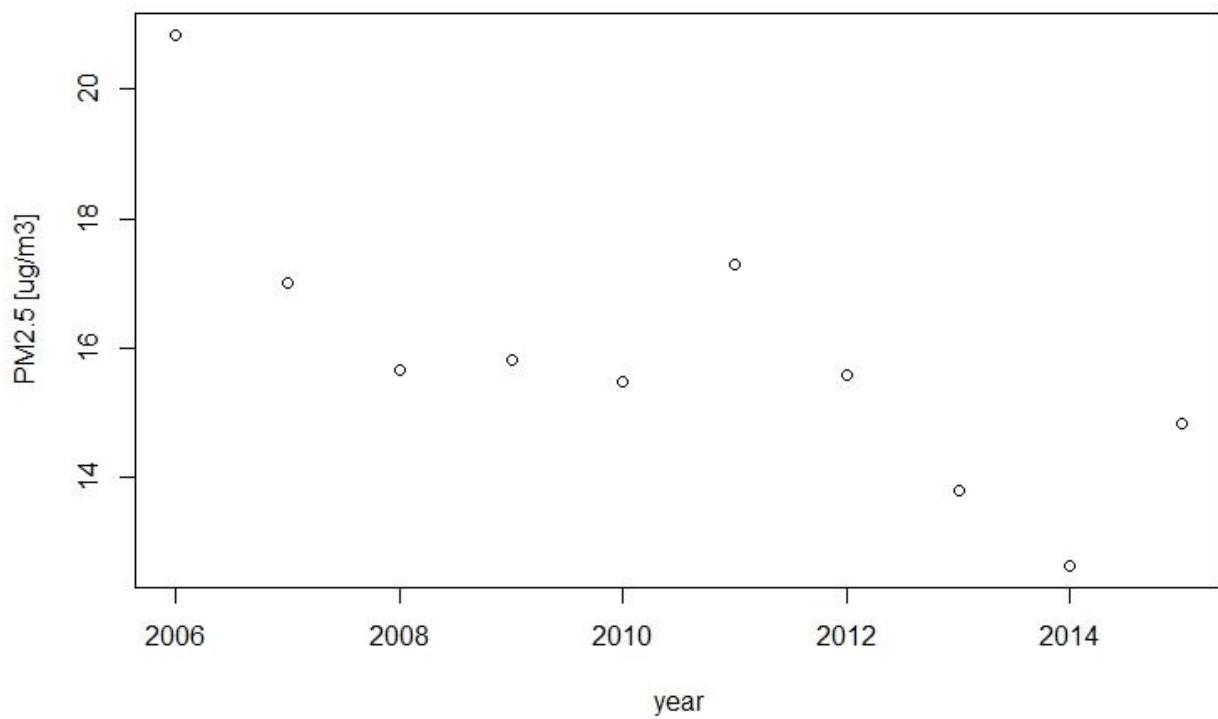

Figure S3. Time series of yearly mean nationwide PM_{2.5} concentration.

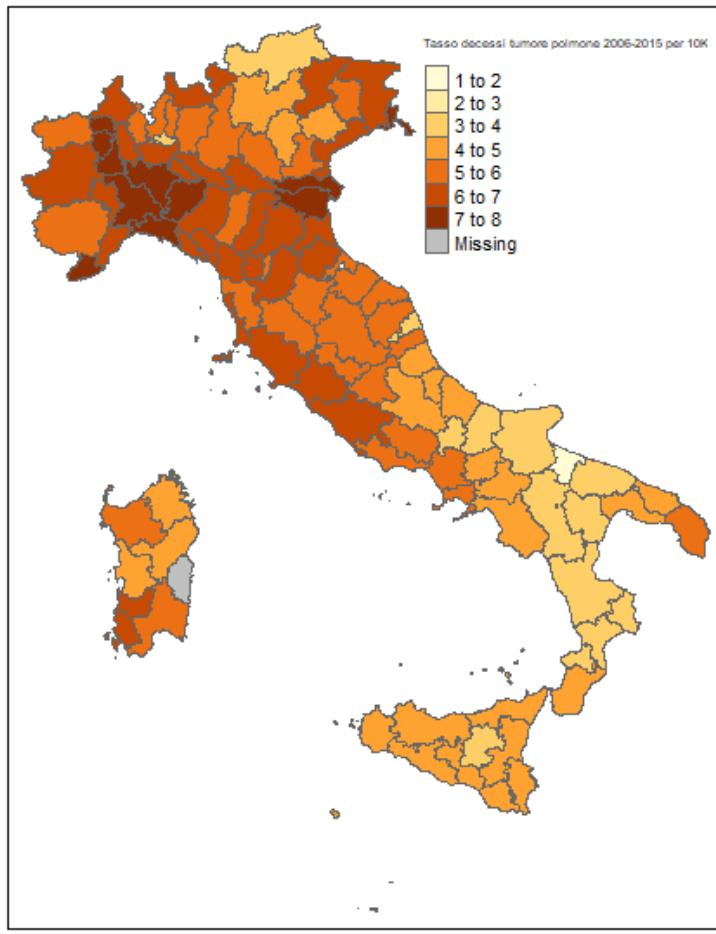

Figure S4. LC mortality rate per 100k persons by Province. 2006-2015 data.

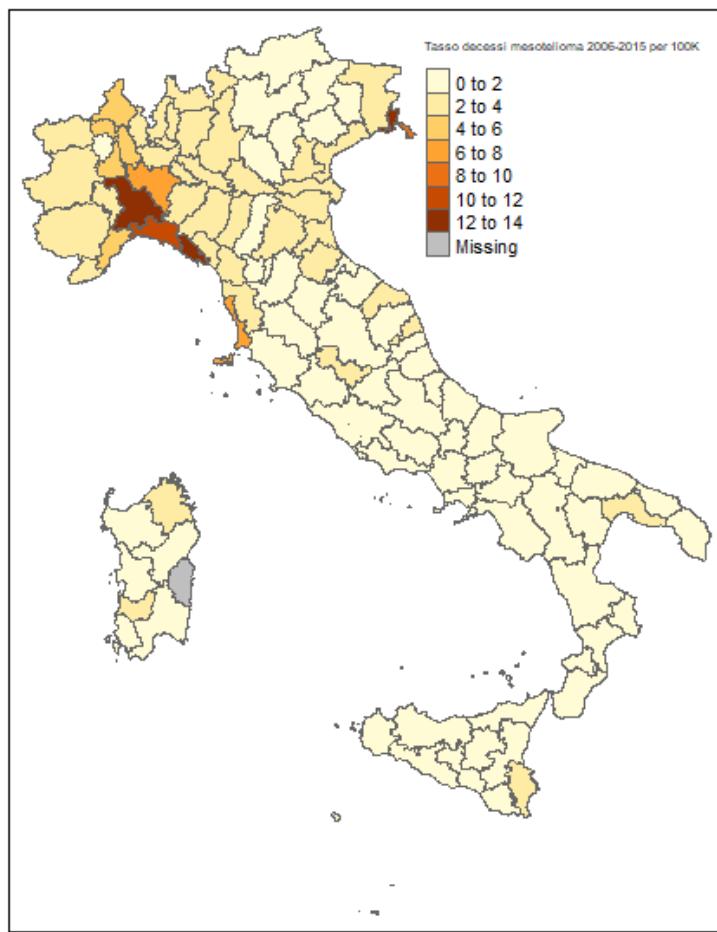

Figure S5. Mesothelioma mortality rate per 100k persons by Province. 2006-2015 data.

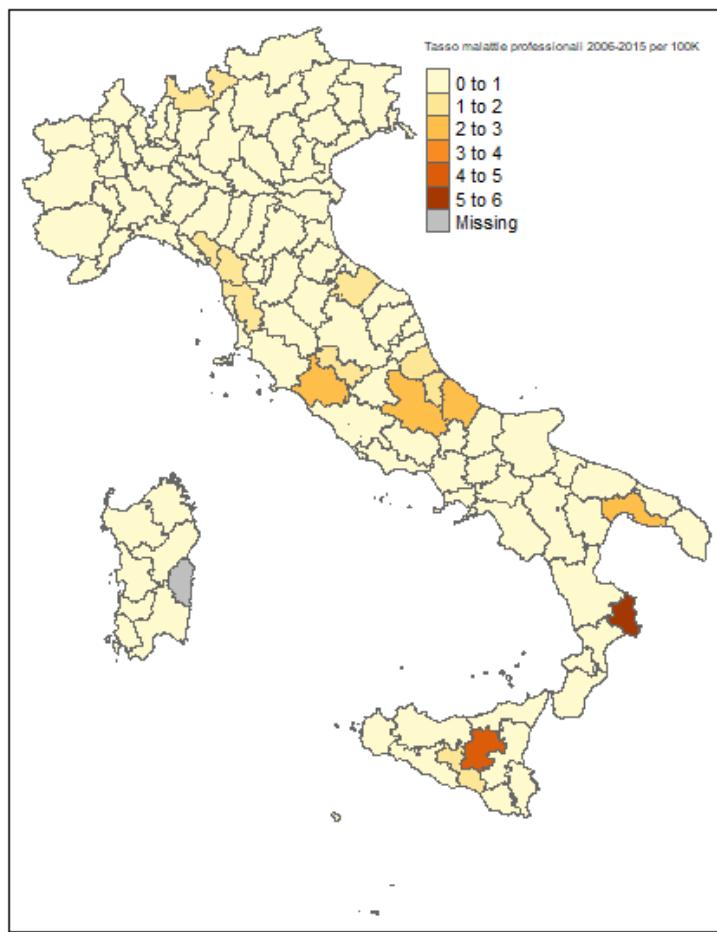

Figure S6. Occupational respiratory disease rate per 100k persons by Province. 2006-2015 data.

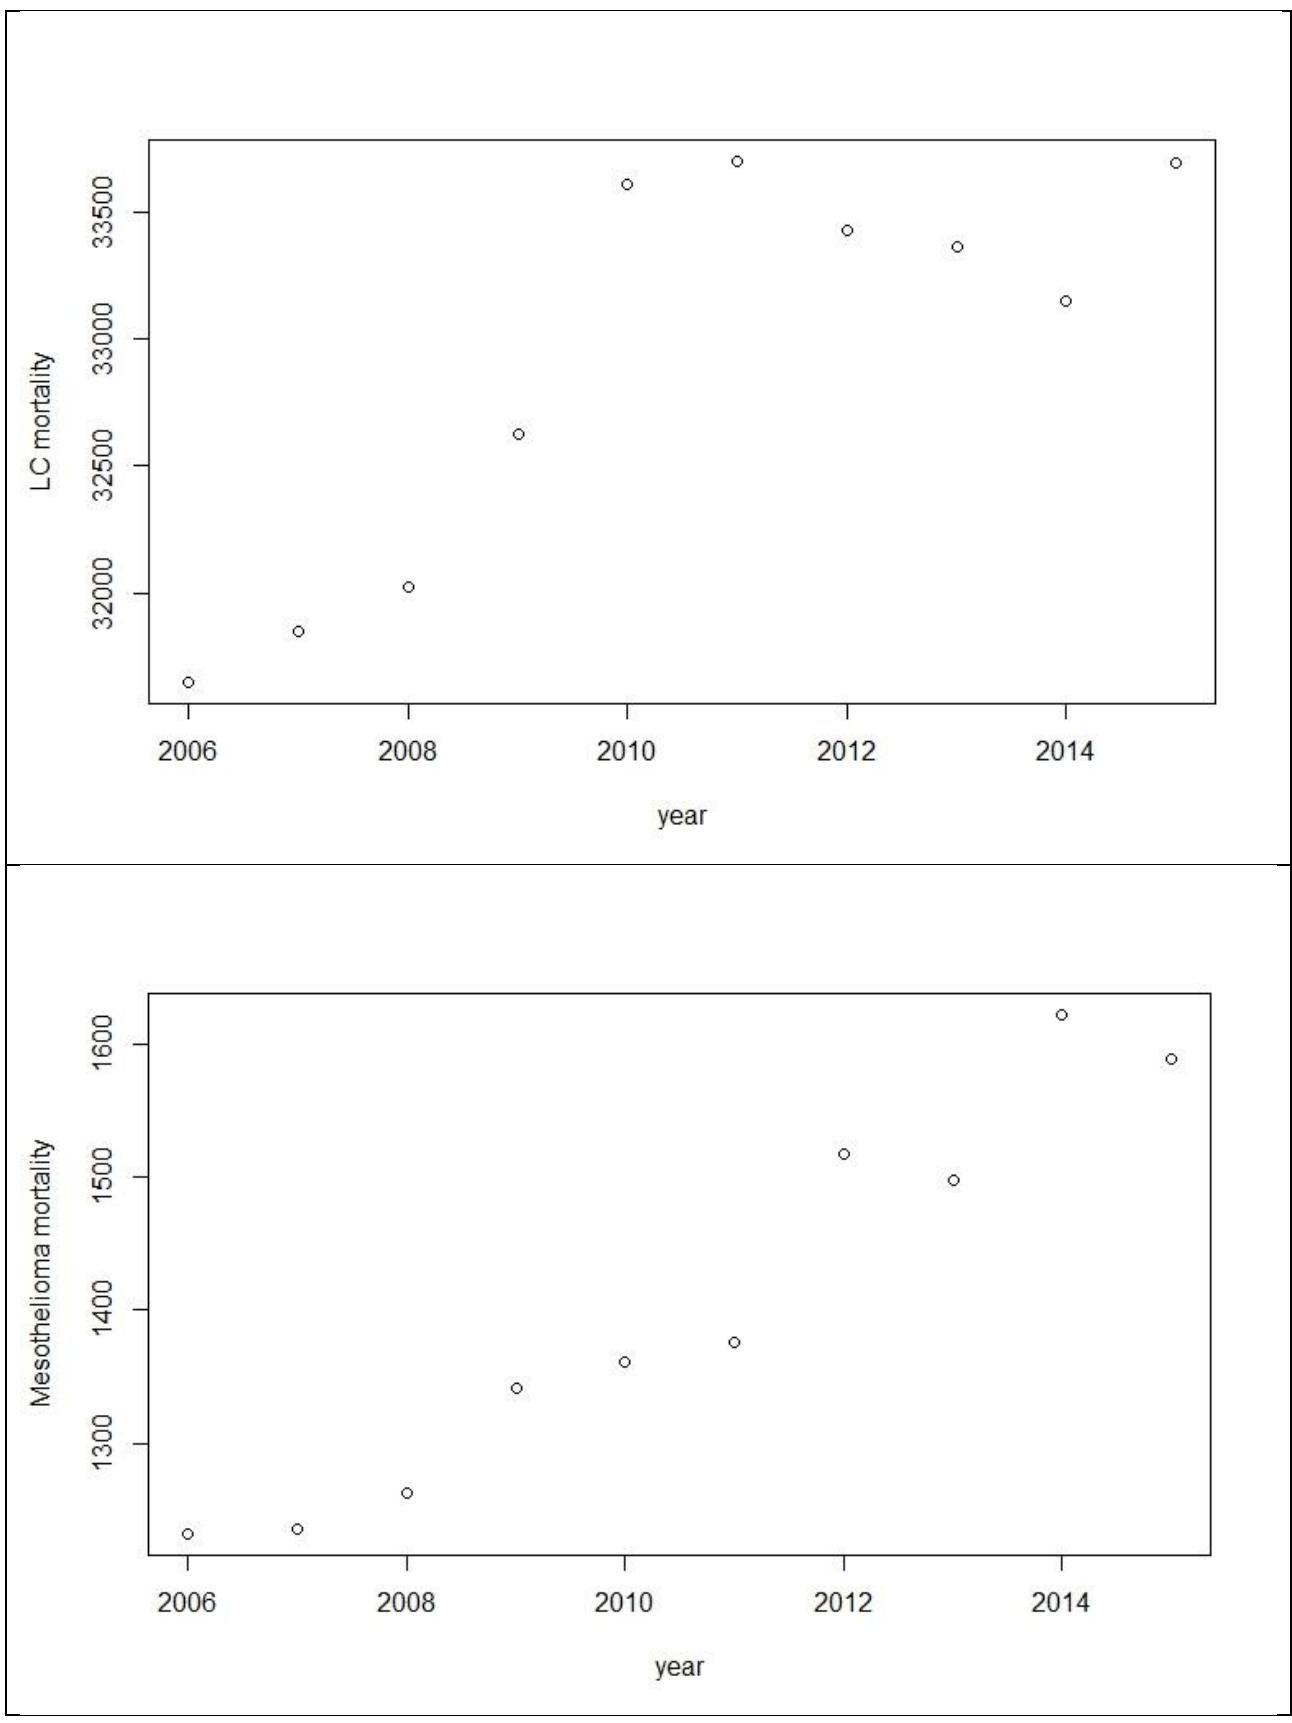

Figure S7. Time series of total lung cancer cases (top) and mesothelioma cases (bottom) occurring at national level during years 2006-2015.

Table S1. Increment Risk [%] (95% CI) of lung cancer (LC) mortality by Deprivation and Urbanization. 2006-2015.
