

**Supplementary Table S4. Simple and multiple regression analysis between GDM knowledge status (ever heard of GDM and never heard of GDM) and students' characteristics (N=735)**

Sociodemographic Characteristics		Unadjusted* OR (95% CI)	Adjusted OR (95% CI) *
<b>Gender</b>	Male	ref	
	Female	4.398 (3.024-6.397) <sup>a</sup>	3.444 (1.944-6.102) <sup>a</sup>
<b>Family history of diabetes</b>	No	ref	
	Yes	1.489 (1.073-2.065) <sup>a</sup>	1.311 (0.913-1.882)
<b>Weight (kg)</b>		0.989 (0.980-0.999) <sup>a</sup>	1.010 (0.997-1.023)
<b>Height (m)</b>		0.002 (0.000-0.019) <sup>a</sup>	0.079 (0.003-2.270)

\*=Ordinal logistic regression used. <sup>a</sup>=statistically significant after regression (p<0.05).
