

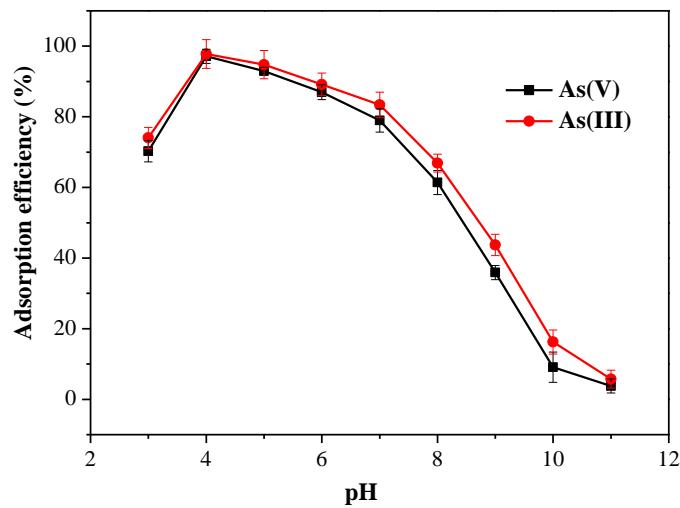

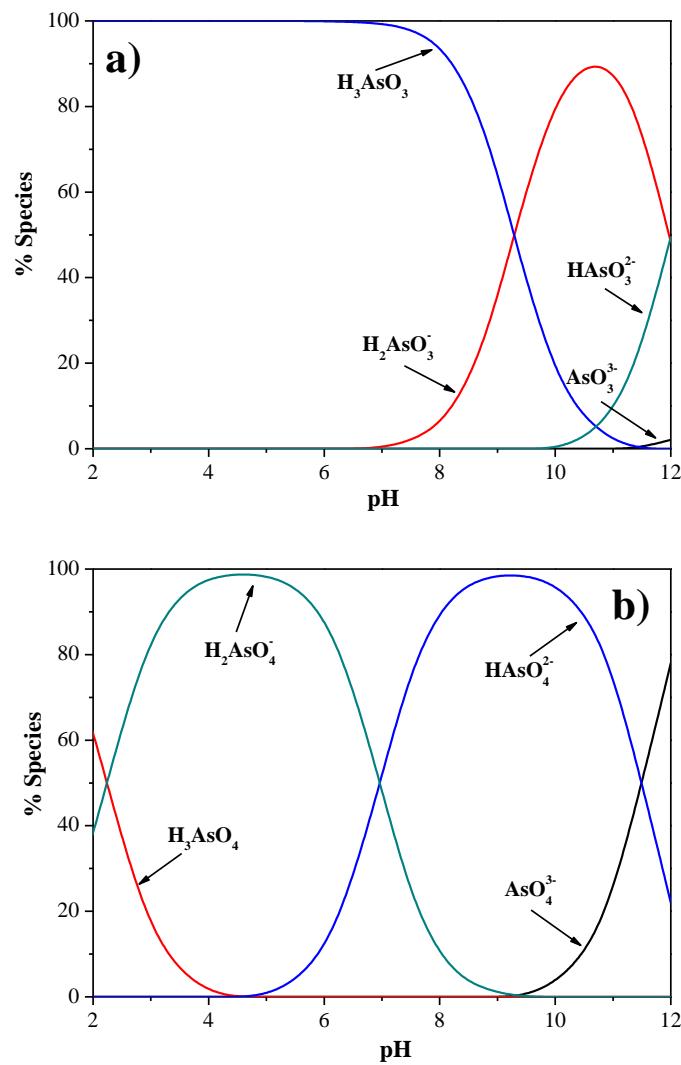

**Fig. S1.** Effect of  $\text{MnO}_2@\text{La(OH)}_3$  dosage on arsenic removal at pH 4.0. Experimental conditions: adsorbent dosage, 0.5 g/L; initial As concentration, 65 mg/L.

**Fig. S2.** Comparison of the effect of solution pH on As(V) and As(III) removal. Experimental conditions: adsorbent dosage, 0.5 g/L; initial As concentration, 65 mg/L.

**Fig. S3.** The distribution of arsenic species under different pH: a) As(III), and b) As(V).
