PBET-GI							1	0.985**	0.982**
SBRC-G								1	0.989**
SBRC-GI									1

Note that “*”Significant at $p < 0.05$ level; “**”Significant at $p < 0.01$ level. “-”, negative correlation; “+”, positive correlation. OM: Organic Matter; CEC: Cation Exchange Capacity. SBRC: Cr bioaccessibility (%) estimated through the SBRC method; PBET: Cr bioaccessibility (%) estimated through the PBET method; “G”, gastric phase; “GI”, gastrointestinal phase
