

Social Group	Definition
Urban Uptown (U1)	Home to the most affluent individuals living in the city core, who are able to purchase luxury goods and vacation abroad regularly
Midtown Mix (U2)	Home to those who are younger and have active social lives within the city, leading them to spend money frequently at bars and restaurants while also having the ability to purchase new consumer electronics
Urban Core (U3)	Contains individuals with more modest incomes; therefore, they are more likely to live in apartments within the city and have less disposable income for eating out and purchasing goods
Elite Suburbs (S1)	Where individuals with six-figure incomes and large homes reside; these individuals spend their money on expensive clothes, cars, and vacations
The Affluentials (S2)	Enjoy comfortable living in the suburbs and have white-collar jobs; they consistently buy healthier foods and computer equipment
Middleburbs (S3)	Consist of individuals who are homeowners in the suburbs that shop at midscale department stores and regularly eat at casual-dining restaurants
Inner Suburbs (S4)	Home to a mix of young and retired individuals who can be homeowners or renters; these individuals have downscale lifestyles and do not have the ability to eat out or shop regularly
Second City Society (C1)	Comprised of individuals who live outside of the urban core, with large homes and holding executive jobs; residents also spend more on casual dining and upscale retailers
City Centers (C2)	Home to those in satellite cities who are middle class and regularly go to movie theaters and bowling alleys
Micro-City Mix (C3)	Consists of downscale, blue-collar residents who do not have readily available disposable income for dining, activities, and goods
Landed Gentry (T1)	Residents live in smaller towns but have large homes, college degrees, and professional jobs; these individuals spend their disposable incomes on cars and recreational equipment (e.g., powerboats and four-wheelers)
Country Comfort (T2)	Home to upper-middle-class individuals who regularly participate in outdoor activities, woodworking, and crafting and prefer to own larger trucks and SUVs
Middle America (T3)	Residents are middle to lower-class individuals who prefer fishing, hunting, and meeting at civic clubs; in these remote areas, high school football is a main source of entertainment
Rustic Living (T4)	Residents live in the most remote towns and have modest incomes; these individuals spend their leisure time participating in small-town activities, such as social groups at local churches, veterans' clubs, and car racing

Variables

TOTALPOPUL	Total Population 2020
LACK_HEALT	Lack of health insurance
PHYSICAL_I	Physical inactivity
FREQUENT_P	Frequent physical health distress
DRUGS	Household Avg. expenditure on drugs
PVTY AGE	Percent poverty
UNEMP	Percent unemployed of the civilian labor force

UNEMP	50 (11.42)	0 (0.00)

a: This number in the parenthesis ranges from 0 to 100%, and can be interpreted as a local, regional, global scale based on the geographical context from low to high.

b: In the parentheses, the percentage of features that have significant coefficients of an explanatory variable.

UNEMP	50 (0.82)	63 (1.04)

a: This number in the parenthesis ranges from 0 to 100%, and can be interpreted as a local, regional, global scale based on the geographical context from low to high.

b: In the parentheses, the percentage of features that have significant coefficients of an explanatory variable.

Moran's I Statistic for Prevalence of mental Health: ZCTA-level (left panel) and County-level (right panel)

The Moran's I statistic for mental health at the ZCTA-level is 0.56 with a z-score of 624, while for mental health at the county-level are 0.70 with z-score of 121. In both models, there is a less than 1% chance that the clustered patterns are a result of chance. The following maps visually illustrate this point in which despite of aggregations mental health at both levels display remarkably similar spatial patterns.

Hot Spot Analysis for Crude Prevalence of Mental Health Not Good for > 14 days among Adults 18 Years or Older for ZCTAs (left) and Counties (right)
