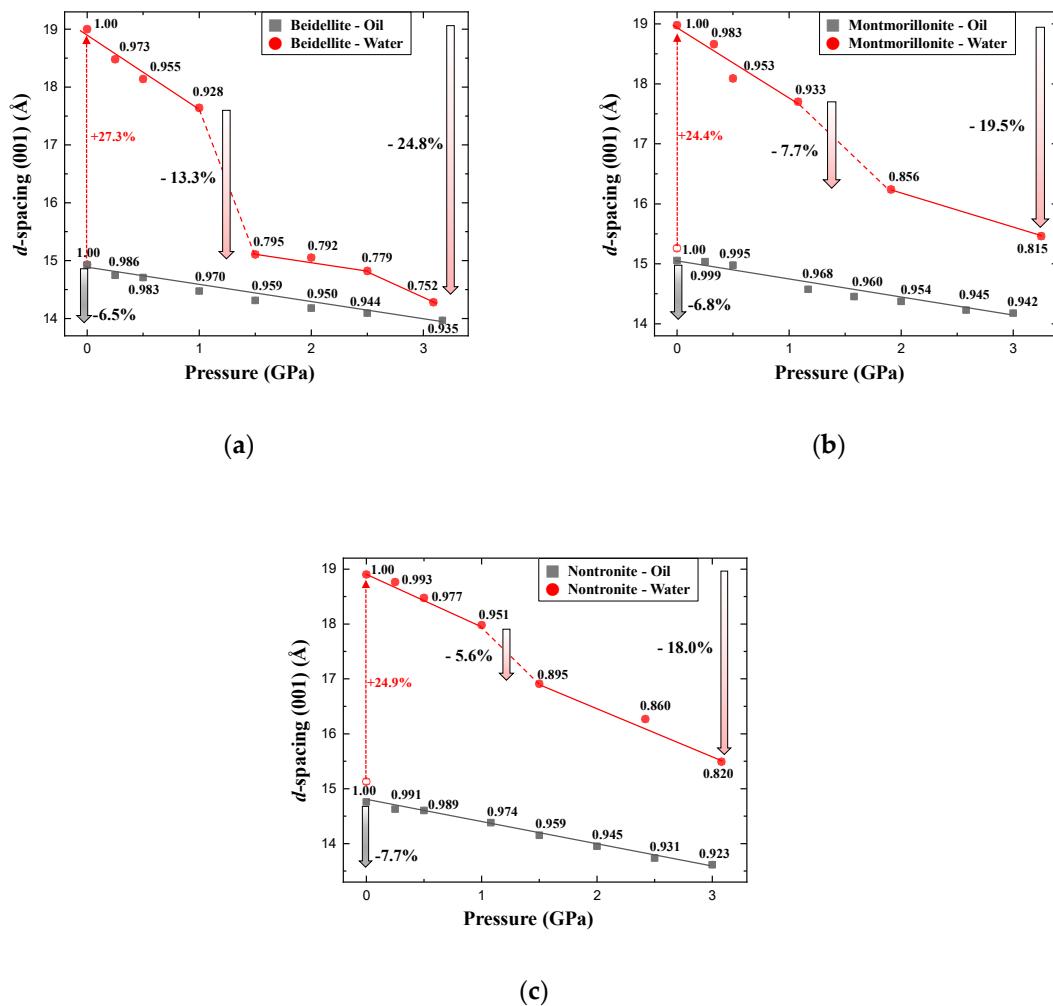

Figure S1. Pressure-dependent changes of the interplane (001) distances of (a) beidellite, (b) montmorillonite, and (c) nontronite in present of silicone-oil and distilled water PTMs for anhydrous and hydrous environments, respectively. Normalized *d*-spacing changes are shown on data points.

Table S1. Final refined unit-cell parameters, volumes, d -spacing of (001) plane, and FWHM of (001) reflections of beidellite under pressure conditions.^{a,b,c}

PTM		Silicone-Oil
