22.	1665	dead	dead	100
23.	1435	dead	dead	100
Mean: 88%				

6 ¹ Correspondence refers to the relationship between remote sensing vs. ground inventory results where any
7 difference in scale (1-4) resulted in a 25% deduction in similarity.

13 N_a , H_o and H_E – means values per population; HWE, Hardy-Weinberg equilibrium, ns - not
14 significant, * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$. Data obtained from FSTAT programme [18].
