

Supplementary Table S1

Table S1. Questionnaire of the survey carried out in the frame of the FP-1403 NNEXT Cost Action (Non-native tree species for European forests: experiences, risks and opportunities) and its Working Group 2 - 'Pathways' on a) non-native tree species established field trials and b) the existing official or non-official recommendations for planting of their FRM in the participating countries.

PART A - GENETIC TRIALS			
Country:			
Non native tree species:			
Genetic test - Local name/Number :			
Type of genetic trial	Provenance	Clonal	Family/Progeny test
Location of the genetic trial	Longitude	Latitude	Altitude
Year of Establishment:			
Type of genetic trial	IUFRO	Internat.	National
Number of provenances tested:			
Data of tested provenances/origins (IUFRO origin no, coordinates of origin of tested material)			
Tested genetic material	FRM produced in Europe		Introduced to Europe FRM
IUFRO seed source No:			
Latitude of origin :			
Longitude of origin:			
Altitude of origin:			
Important Results:			
References (if results have been published):			
1.			
2.			
3.			
4.			

PART B: PROVENANCE RECOMMENDATIONS			
Country:			
Non native tree species:			
	Do official provenance recommendations for this species exist?	Yes	No
			Comments
Official recommendations	If yes, please describe these recommendations.:		
	A) Are the recommendation specific for certain provenances		
	B) Or for provenances from specific seed zones		
	C) Or for provenances from specific countries		
	Are the provenance recommendations mandatory for the use of FRM of this species (i.e. do they have to follow the recommendations):		
	A) Mandatory		
	B) Voluntary		
	Are the provenance recommendations based on previous genetic tests?		
	A) On provenance trials with tree ages > 10 years		
	B) On seedling tests with ages < 10 years		
	C) On climate comparisons		
	D) On tests within neighbouring countries		
	Please specify the recommendations (provenance, seed zones or country of origin):		
	Recommendation 1		
	Recommendation 2		
.....			
Please provide reference to the recommendations if references exist (can be in national language)			
Reference 1			
Reference 2			
.....			
Unofficial recommendations (i.e. from publications)	Do unofficial provenance recommendations for this species exist in publications?	Yes	No
			Comments
	If yes, please describe these recommendations.:		
	A) Are the recommendation specific for certain provenances		
	B) Or for provenances from specific seed zones		
	C) Or for provenances from specific countries		
	Are the provenance recommendations based on previous genetic tests?		
	A) On provenance trials with tree ages > 10 years		
	B) On seedling tests with ages < 10 years		
	C) On climate comparisons		
D) On tests within neighbouring countries			
Please specify the recommendations (provenance, seed zones or country of origin):			
Recommendation 1			
Recommendation 2			

.....
Please provide reference to the recommendations if references exist (can be in national language)
Reference 1
Reference 2
