Lowercase letters represent significant differences among different sampling seasons in the same litter treatment and same forest type.

**Figure S1.** Soil temperature from Oct 2017 to Dec 2018 (A) and soil moisture was affected by litter treatment at different times in three forests (B). The circles indicate the sampling season. Values indicate means  $\pm$  standard error,  $n = 3$ . The asterisks represent the significant differences between different litter treatments in the same sampling season. Lowercase letters represent significant differences among different sampling seasons in the same litter treatment.
