

Supplemental material for:

Composition and structure of forest fire refugia: What are the ecosystem legacies across burned landscapes? (Forests, 2018)

Authors:

Garrett W. Meigs, Meg A. Krawchuk

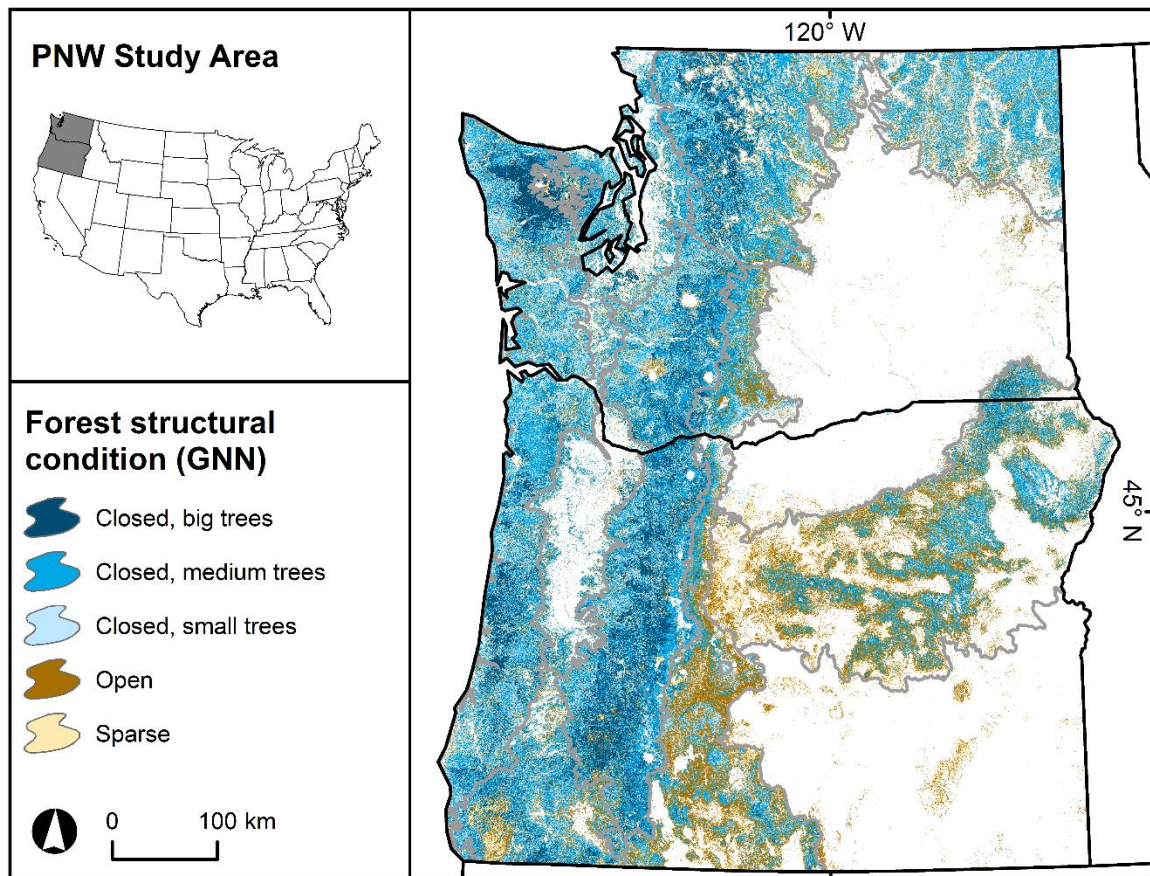

Figure S2. Forest structure across the Pacific Northwest study area. Forest structural condition classes are based on live tree canopy cover and size classes according to 2003 (pre-fire) GNN maps developed after Ohmann et al. [38]. See Methods for details regarding forest type classification. See Table 3 for forest type codes and extent across study fires. See Figure 2 for ecoregion identification. See Figure 4 for landscape spatial patterns.
