

Table S1. Information about collection date, number of tested animals and samples, high-throughput real-time PCR results, and IDV single-plex real-time RT-PCR results for the influenza D virus positive herds. IDV, influenza D virus; BCoV, bovine coronavirus.

Herd ID	Collection date	High-throughput real-time PCR analysis					Single-plex real-time RT-PCR analysis
		No. of animal tested	Tested as pool (no. of samples in the pool)	Pool tested positive for	No. of samples tested as individual sample	Individual samples tested positive for	No. of individual samples from pool tested positive for IDV
1	06-02-19	8	Yes (8/8)	IDV <i>Mycoplasma</i> <i>P. multocida</i>	4	1. IDV, <i>P. multocida</i> 2. IDV 3. IDV, <i>Mycoplasma</i> , <i>P. multocida</i> 4. IDV	4/4 One sample (3) sequenced D/bovine/Denmark/6171103755-1/2019

+ indicates prediction of an N-glycosylated site. - indicates a non-glycosylated site. / indicates no prediction of a glycosylated site.

Definition according to <https://services.healthtech.dtu.dk/service.php?NetNGlyc-1.0>:

+ Potential > 0.5, ++ Potential > 0.5 and Jury agreement (9/9) or Potential > 0.75, +++ Potential > 0.75 and Jury agreement, ++++ Potential > 0.90 and Jury agreement.

- Potential < 0.5, -- Potential < 0.5 and Jury agreement (all nine < 0.5), --- Potential < 0.32 and Jury agreement.
