

Supplementary Figure S1

Supplementary Figure S1. P-values of phage stability in pH 3-adjusted TSB assay. A)

P values of phage titres between time-points for a given phage. The colour intensity correlates with the P-value; deep red represents a high P-value, while light pink represents a low P-value. **B)** P-values of phage titres between different phages at a given time-point. The colour intensity correlates with the P-value; deep red represents a high P-value, while white represents a low P-value.
