

Supplementary Materials: Reduction-Responsive Molecularly Imprinted Poly(2-isopropenyl-2-oxazoline) for Controlled Release of Anticancer Agents

Michał Cegłowski, Valentin Victor Jerca, Florica Adriana Jerca, Richard Hoogenboom

Figure S1. Calibration curves obtained for (a) *N,N'*-dimethylformamide (DMF) solution; (b) pH 7.4; (c) pH 6.5; (d) pH 2.0.

Figure S2. ^1H NMR of poly(2-isopropenyl-2-oxazoline) (PiPOx).
