

Population Pharmacokinetics of Meropenem in Critically Ill Korean Patients and Effects of Extracorporeal Membrane Oxygenation

Dong-Hwan Lee, Hyoung Soo Kim, Sunghoon Park, Hwan-il Kim, Sun Hee Lee and Yong Kyun Kim

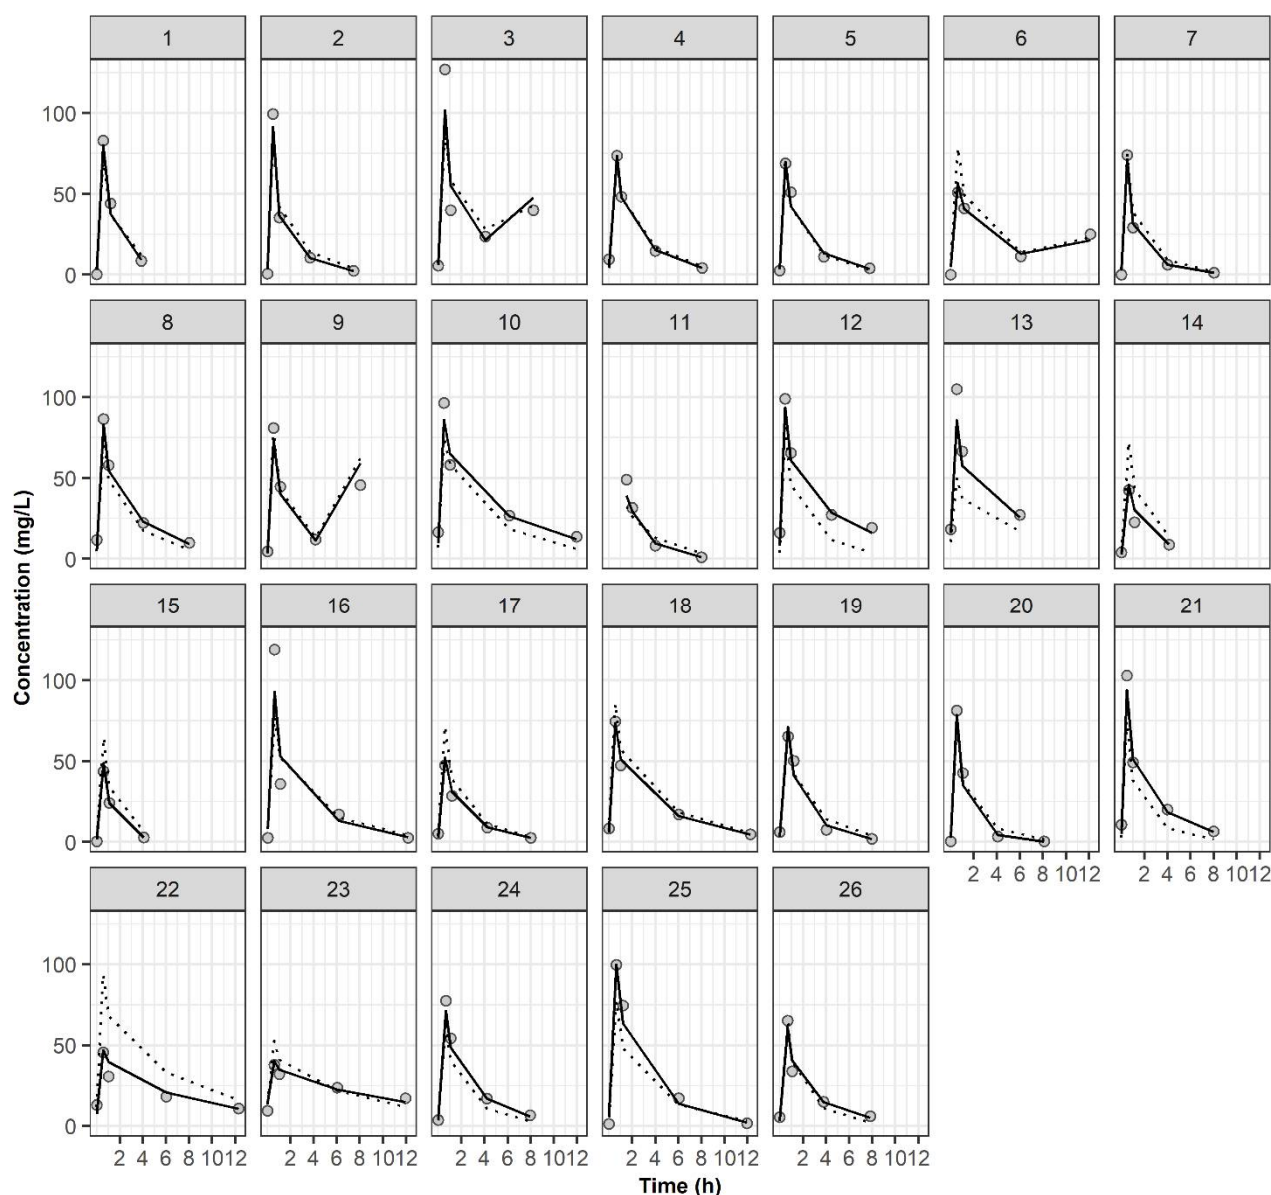

Figure S1. Individual fit plots. Closed circle, observed concentration; solid line, individual-predicted concentrations; dotted line, population-predicted concentrations.

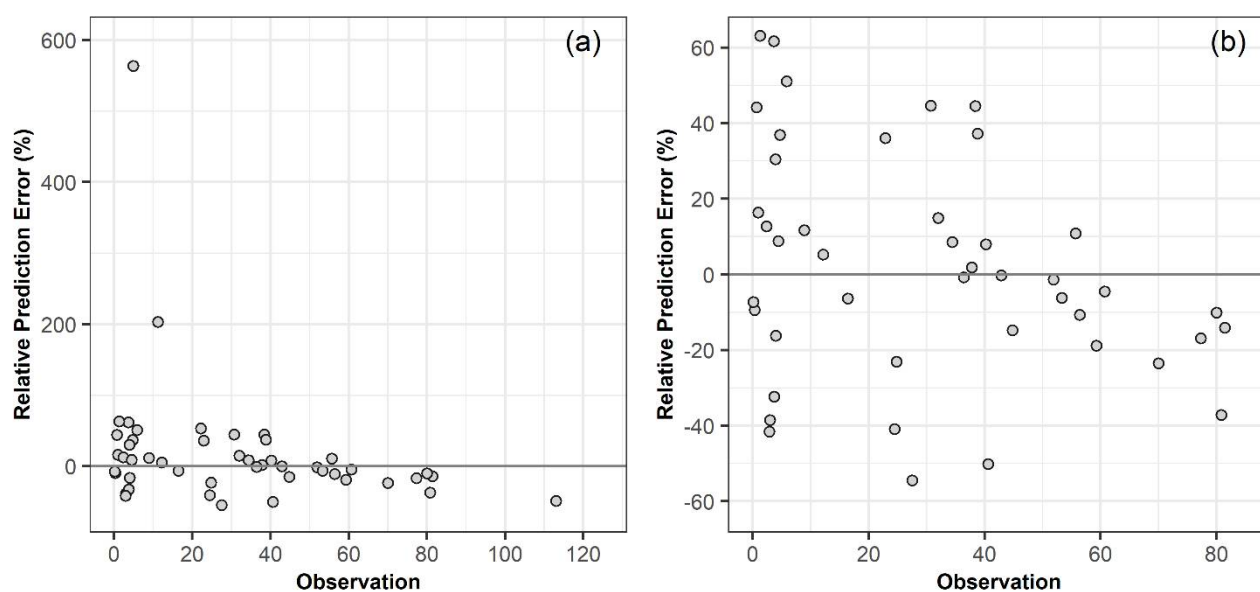

Figure S2. Relative prediction errors vs observations for the final population pharmacokinetic model of meropenem: (a) plots for all subjects ($n = 26$), (b) plots excluding the two patients with extreme values ($n = 24$).
