

Supplementary Materials: Sirolimus Pharmacokinetics Variability Points to the Relevance of Therapeutic Drug Monitoring in Pediatric Oncology

GagoAmelia-Naomi Sabo, Sarah Jannier, Guillaume Becker, Jean-Marc Lessinger, Natacha Entz-Werlé and Véronique Kemmel

Figure S1. Diagnostic plots. Normalized prediction distribution error (NPDE) *versus* time at D1 (a) and D8 (c). x-axis: time after first Sirolimus intake (in hours). Normalized prediction distribution error (NPDE) *versus* predicted concentrations at D1 (b) and D8 (d). x-axis: predicted concentrations (Cc) (in $\mu\text{g}/\text{L}$). Dashed lines represent -2 and +2 interval. Solid line: theoretical NPDE mean.
