 $\textbf{Table S1.} \ \ \text{CONSORT 2010 checklist of information to include when reporting a randomised trial *}.$

Section/Topic	Item No	Checklist Item	Reported or Page No
		Title and Abstract	
	1a	Identification as a randomised trial in the title	1
	1b	Structured summary of trial design, methods, results, and conclusions (for specific	1
	10	guidance see CONSORT for abstracts)	1
		Introduction	
Background and	2a	Scientific background and explanation of rationale	2,3
objectives	2b	Specific objectives or hypotheses	2
		Methods	
Trial design	3a	Description of trial design (such as parallel, factorial) including allocation ratio	3–14
	3b	Important changes to methods after trial commencement (such as eligibility	n/a
		criteria), with reasons	•
Participants	4a	Eligibility criteria for participants	4–6
T un treip units	4b	Settings and locations where the data were collected	4
Interventions	5	The interventions for each group with sufficient details to allow replication,	5,6
	-	including how and when they were actually administered	5,5
	6a	Completely defined pre-specified primary and secondary outcome measures,	6
Outcomes		including how and when they were assessed	
	6b	Any changes to trial outcomes after the trial commenced, with reasons	n/a
Sample size	7a	How sample size was determined	14
_	7b	When applicable, explanation of any interim analyses and stopping guidelines	n/a
Randomisation:			
Sequence	8a	Method used to generate the random allocation sequence	4,5
generation	8b	Type of randomisation; details of any restriction (such as blocking and block size)	4,5
Allocation		Mechanism used to implement the random allocation sequence (such as	
concealment	9	sequentially numbered containers), describing any steps taken to conceal the	4,5
mechanism		sequence until interventions were assigned	
Implementation	10	Who generated the random allocation sequence, who enrolled participants, and	4,5
1		who assigned participants to interventions	,
D1: 1:	11a	If done, who was blinded after assignment to interventions (for example,	5
Blinding	441	participants, care providers, those assessing outcomes) and how	- /
	11b If relevant, description of the similar	1	5,6
Statistical methods	12a	Statistical methods used to compare groups for primary and secondary outcomes	14
	12b	Methods for additional analyses, such as subgroup analyses and adjusted analyses	14
D (; ;) (I /		Results	
Participant flow (a	13a	For each group, the numbers of participants who were randomly assigned, received	4
diagram is strongly	101.	intended treatment, and were analysed for the primary outcome	4
recommended)	13b	For each group, losses and exclusions after randomisation, together with reasons	4
Recruitment	14a	Dates defining the periods of recruitment and follow-up	4
	14b	Why the trial ended or was stopped	n/a
Baseline data	15	A table showing baseline demographic and clinical characteristics for each group	3
Numbers analysed	16	For each group, number of participants (denominator) included in each analysis	3,4,14
•		and whether the analysis was by original assigned groups	
Outcomes and	17a	For each primary and secondary outcome, results for each group, and the estimated	14–27
estimation		effect size and its precision (such as 95% confidence interval)	
estiliation	17b	For binary outcomes, presentation of both absolute and relative effect sizes is recommended	n/a
	18		
Ancillary analyses		Results of any other analyses performed, including subgroup analyses and adjusted analyses, distinguishing pre-specified from exploratory	
Harms	19	All important harms or unintended effects in each group (for specific guidance see	No harms
		CONSORT for harms)	noted
		Discussion	noteu
Limitations	20	Trial limitations, addressing sources of potential bias, imprecision, and, if relevant,	31
Limitations		multiplicity of analyses	

Pharmaceutics **2021**, 13, 510.

Generalisability	21	Generalisability (external validity, applicability) of the trial findings	31		
Interpretation	22	Interpretation consistent with results, balancing benefits and harms, and considering other relevant evidence	2831		
Other Information					
Registration	23	Registration number and name of trial registry	1,3		
Protocol	24	Where the full trial protocol can be accessed, if available	Upon request		
Funding	25	Sources of funding and other support (such as supply of drugs), role of funders	32		

^{*}We strongly recommend reading this statement in conjunction with the CONSORT 2010 Explanation and Elaboration for important clarifications on all the items. If relevant, we also recommend reading CONSORT extensions for cluster randomised trials, non-inferiority and equivalence trials, non-pharmacological treatments, herbal interventions, and pragmatic trials. Additional extensions are forthcoming: for those and for up to date references relevant to this checklist, see www.consort-statement.org.
