

Supplementary data

Figure S1. Effects of enzymolysis time and pH values on the solubility of WPC hydrolysates

Figure S2. Effects of enzymolysis time and pH values on the emulsifying activity WPC hydrolysates

Figure S3. Effects of enzymolysis time and pH values on the emulsion stability of WPC hydrolysates

Figure S4. Effects of enzymolysis time and pH values on the foaming capacity of WPC hydrolysates

Figure S5. Effects of enzymolysis time and pH values on the foaming stability of WPC hydrolysates
