

**Table S1.** Eye irritation response score standard

<b>Factors</b>	<b>Eye stimulation response.</b>	<b>Score</b>
Conjunctival congestion	Clear blood vessels with reddish color	0
	Mildly congested blood vessels with bright red color	1
	Congested blood vessels with fuchsia color, not easy to distinguish	2
	Diffuse hyperemia with fuchsia color, with ciliary hyperemia	3
Conjunctival edema	No edema	0
	Mild edema	1
	Obvious edema, with partial ectropion	2
	Edema to nearly half-closed eyelids	3
	Edema to the extent that the eyelids are half closed	4
Conjunctival secretions	No secretion	0
	Small amount of secretions	1
	The secretions make the eyelids and eyelashes moist or sticky	2
	The secretions make the entire eye area moist or sticky	3
Cornea	Clear and transparent cornea without turbidity	0
	Scattered or diffuse light turbidity, visible iris texture	1
	Easy to distinguish the translucent area, with blurred iris	2
	Translucent cornea, blurred iris, and pupil size is barely visible	3
	Completely cloudy cornea and unrecognizable iris	4
Iris	Normal	0
	Obviously deepened wrinkles, hyperemia, swelling, and mild hyperemia around the cornea; the pupils still respond to light	1
	Bleeding, visible necrosis, no response to light or one of the reactions	2
Highest total score		16

**Table S2.** Evaluation criteria of eye irritation.

<b>Score</b>	<b>Evaluation</b>
0~3	No irritation
4~8	Mild irritation
9~12	Moderate irritation
13~16	Severe irritation
