RRI: relative retention indices; RRI a, relative retention indices calculated against n-alkanes on the DB-5MS column; RI lit b, retention index literature (DB-5 column) [70]; RRI c, relative retention indices calculated against n-alkanes on the DB-WAX column; RI lit d, retention index literature (CW20M column) [71], Peak Area% e; stereoisomers not identified f; NC, non-polar column; PC, polar column, tR, identification based on the retention times (tR) of genuine compounds on the DB-5MS column; MS, identified on the basis of computer matching of the mass spectra with those of the Wiley and NIST libraries and comparison with literature data. The compounds in bold represent the major compounds.
