Attachment: Questionnaire

Evaluation Index Questionnaire of Urban Living Environment Reconstruction in Wenchuan

Earthquake-Stricken Areas

Number：_____   Survey Date：____YY___MM___DD   Residential Location：_____

1. Personal Information

Gender	①Male ②Female
Age (years old)	①Under 20 ②20-29 ③30-39 ④40-49 ⑤50-59 ⑥Over 60
Number of households (persons)	①1 ②2 ③3 ④4 ⑤5 ⑥6 ⑦7 ⑧8 (and above)
Occupation	①Administrative staff ②Enterprise staff ③Career staff ④Peasant ⑤Freelancer ⑥Unemployed ⑦Retired ⑧Student ⑨Others_____
Degree of education	①Junior high school (and below) ②High school ③Vocational education ④Technical secondary school ⑤College ⑥Undergraduate ⑦Master's degree (and above)
Reconstruction mode	①Local unified construction ②Paired assistance ③Residential self-built ④Undecided ⑤Other_____
Housing area	_____m²

2. Basic Problem

① What factors do you think are important for the <u>ecological carrying capacity</u> of a renewed urban environment? **(multiple choice)**

□Disaster prevention management and education

□Facility disaster prevention performance   □Disaster self-prevention and self-help
□Security situations   □Disaster prevention spaces

② What factors do you think are important for the <u>living environments</u> of renewed urban environments? **(multiple choice)**

□Housing quality   □Public service facilities   □Greening and landscaping
□Municipal facilities   □Road traffic   □Community location

③ What factors do you think are important for the <u>life reconstruction</u> of renewed urban environments? **(multiple choice)**

□Employment   □Community culture activities   □Community life services
□Neighborhood relations   □Vulnerable groups   □Psychological reconstruction
