

Supplementary material:

The table indicates the proportion of plant forms that make up the spatial situations studied.

Supplement Table S1. The proportion of plant forms that make up the spatial situations studied.

Key:

Plant forms creating the studied spatial situations:

1. Trees with high crowns
2. Trees with low crowns
3. Bushes that enable an attacker to hide freely (dense, over 90 cm high)
4. Shrubs that do not give an attacker the chance to hide (low, narrow or see-through)/
herbaceous vegetation hindering movement

Share of forms in the park:

- + Sporadic
- ++ Contributing to the layout
- +++ Significant or dominant in the layout
