The journal retracts the article “Improvement in the Poverty Status of Ecological Migrants under the Urban Resettlement Model: An Empirical Study in China” by Guo et al. [1].

Following publication, concerns were brought to the attention of the publisher regarding overlap with a previously published academic paper, published in another language, of a different authorship [2]. The overlap includes the literature review, theoretical and methods sections, analytical framework and discussions, as well as a number of identical figures and tables.

Adhering to our complaints procedure, an investigation was conducted that confirmed significant overlaps with the previous manuscript, and the article is therefore retracted.

This retraction was approved by the Editor in Chief of the journal *Sustainability*.

The authors agreed to this retraction.
