

**Table 1.** Toxicity classification system according to Persoone et al. [49]

Class	I	II	III	IV	V
Threat degree	NO ACUTE HAZARD	SLIGHT ACUTE HAZARD	ACUTE HAZARD	HIGH ACUTE HAZARD	VERY HIGH ACUTE HAZARD
Percentage effect (PE)	≤20%	20% ≤ PE < 50%	50% ≤ PE < 100%	100%	100%
	None of the bioassay show a toxic effect	A toxic effect is measured in at least one bioassay, but the effect level is below 50%	The PE is reached or exceeded in at least one bioassay, but the effect level is below 100%	The PE 100% is reached in at least one bioassay	The PE 100% is reached in all bioassays
