

Supplementary 1. The complete questionnaire with all questions (Q) and statements (S), including identification numbers and response alternatives.

Id.no.	Question or statement	Response alternatives
PART 1		
Q1	What year were you born?	Open-ended
Q2	What gender do you identify with?	Nominal: male / female / other
Q3	What is the approximate level of yearly household income (before taxes)?	Interval: 11 graded scale with intervals of 100.000 SEK
Q4	How many adults live in the household?	Open-ended
Q5	Are there children in the household?	Nominal: yes / no / sometimes
Q6	What is your current accommodation?	Nominal: rental / self-owned / other
Q7	→ If you rent your accommodation, do you live as...	Nominal: tenant / lodger / other
Q8	→ If you own your accommodation, do you live in a...	Nominal: condominium / self-owned property
Q9	Do you live in a...	Nominal: large city center / large city outskirts / city center / city outskirts / larger village / smaller village / countryside
Q10	What municipality do you mainly live in?	Nominal: Göteborg / Malmö / Skövde / Uddevalla / Vellinge / Ängelholm / other municipality
Q11	What level of education (finished or ongoing) do you have?	Nominal: not finished elementary school / elementary school or similar / high school (or similar) / post-high school education (not university or college) / university or college / doctoral studies
Q12	How would you judge your general health condition?	Ordinal: seven-graded Likert scale
Q13	What political party would you vote for, if the elections were today?	Nominal: Social Democratic Party / Green Party / Center Party / Liberals / Moderate Party / Christian Democrats / Sweden Democrats / Left Party / Feminist Initiative / other party / do not know
Q14	Here we wish to know your principle view on the distribution of responsibility. How do you generally think that responsibility should be distributed? a) Responsibility should be distributed equally. b) The more one has to gain from the solving of a problem, the larger responsibility one should take.	Interval: five-graded Likert scale

- c) The larger guilt one has for the problem arising, the larger responsibility one should take.
- d) The more equipped one is to deal with the problem (in terms of money, knowledge, influence, etc.), the larger responsibility one should take.
- e) How responsibility is distributed does not matter, as long as the problem is solved.

PART 2

Q15	Have you personally experienced flooding?	Nominal: yes / no / do not know
Q16	→ If yes, were have you experienced flooding?	Nominal: where I live / in areas where I move regularly / elsewhere
Q17	→ If yes, to what extent have the flooding caused you problems?	Ordinal: seven-graded Likert-scale
Q18	How actively do you think your municipality is working with climate adaptation, i.e. to mitigate the negative effects of climate change?	Ordinal: seven-graded Likert-scale
Q19	Have you, alone or together with others, done anything to adapt your accommodation to climate change?	Nominal: yes / no / do not know
Q20	How large possibilities do you think you have to adapt your accommodation to climate change?	Ordinal: seven-graded Likert-scale
Q21	What do you perceive to be the largest barriers for you to adapt your accommodation to climate change? Give a maximum of three alternatives.	Nominal: my landlord / housing cooperative does not prioritize the issue / I cannot afford it / I lack time / I lack the stamina / I lack knowledge on what to do / I lack knowledge about the risks / I do not think it so important / I do not perceive any barriers / I do not know
Q22	Do you think global climate change affects your surroundings in a positive way?	Ordinal: seven-graded Likert-scale
Q23	Do you think global climate change affects your surroundings in a negative way?	Ordinal: seven-graded Likert-scale
Q24	Do you think global climate change do not have any effects on your surroundings?	Ordinal: seven-graded Likert-scale
Q25	Do you think you have experienced positive effects on your surrounding of global climate change?	Ordinal: seven-graded Likert-scale
Q26	Do you think you have experienced negative effects on your surrounding of global climate change?	Ordinal: seven-graded Likert-scale
Q27	Do you think you have not experienced any effects of global climate change?	Ordinal: seven-graded Likert-scale

PART 3A: To what degree do you agree with the following statements?		
S1	Municipal inhabitants have a responsibility to influence the local government to implement adaptation measures to decrease flood risks.	Ordinal: seven-graded Likert-scale; do not know
S2	Municipal inhabitants have a responsibility to influence their landlord, housing collective, or neighbors to implement adaptation measures to decrease flood risks.	Ordinal: seven-graded Likert-scale; do not know
S3	Property owners should take responsibility themselves to decrease the flood risks for their property.	Ordinal: seven-graded Likert-scale; do not know
S4	Property owners should implement adaptation measures on their properties to decrease the flood risks for the neighborhood.	Ordinal: seven-graded Likert-scale; do not know
S5	The local government should decide to what degree property owners are allowed to make changes to their properties that increase flood risks for the neighborhood.	Ordinal: seven-graded Likert-scale; do not know
S6	The local government should give subsidies to property owners that cannot pay themselves for adaptation measures.	Ordinal: seven-graded Likert-scale; do not know
S7	If the local government decides that new properties are to be built in a manner decreasing flood risks, the local government should pay for the extra expenses.	Ordinal: seven-graded Likert-scale; do not know
S8	Local governments with large financial capacity should contribute to climate adaptation measures by local governments with weak financial capacity.	Ordinal: seven-graded Likert-scale; do not know
S9	Local governments in areas with small needs of climate adaptation should contribute to adaptation measures by local governments in areas with large needs.	Ordinal: seven-graded Likert-scale; do not know
S10	The right to build in areas where there is a high flood risk should be limited by national regulation.	Ordinal: seven-graded Likert-scale; do not know
S11	The national government should give subsidies to local governments wanting to implement ambitious adaptation measures.	Ordinal: seven-graded Likert-scale; do not know
S12	The national government should subsidize adaptation measures by local governments with weak financial capacity.	Ordinal: seven-graded Likert-scale; do not know
S13	The national government should give subsidies to local governments in areas with large needs of climate adaptation, regardless of the financial capacity of the local government.	Ordinal: seven-graded Likert-scale; do not know

S14	Corporations active in Sweden and with large emissions of greenhouse gases should take on a larger responsibility for climate adaptation in society.	Ordinal: seven-graded Likert-scale; do not know
S15	Corporations active in Sweden should take on a larger responsibility for climate adaptation in society, as adaptation then becomes more efficient.	Ordinal: seven-graded Likert-scale; do not know
PART 3B: To what degree do you think actors need to take on responsibility for particular aspects of adaptation?		
S16	The responsibility for deciding whether one should build a property on land with a high flood risk should reside with...	Ordinal: seven-graded Likert-scale; do not know
S17	a) The property buyer	
S18	b) The developer	
S19	c) The local government	
	d) The national government	
S20	The responsibility for informing the public about flood risks and possible adaptation measures should reside with	Ordinal: seven-graded Likert-scale; do not know
S21	a) Local governments	
S22	b) County administrative boards	
S23	c) The national government	
S24	d) Experts	
S25	e) Media	
	f) Non-profit organizations (like tenancy associations, environmental organizations and the Red Cross)	
S26	g) Each individual, informing themselves	
S27	The expenses related to flooding of property should be borne by:	Ordinal: seven-graded Likert-scale; do not know
S28	a) Property owners, even if they have implemented adaptation measures	
S29	b) Property owners that have not implemented adaptation measures	
S30	c) Residents	
S31	d) Insurance companies	
S32	e) The local government	
	f) The national government	
S33	It is better if decisions about climate adaptation measures are taken by:	Ordinal: seven-graded Likert-scale; do not know
S34	a) Experts	
S35	b) Politicians	
S36	c) Each individual	
	d) It does not matter, as long as the measures are efficient	
Q28	Do you trust climate change research?	Ordinal: seven-graded Likert-scale; do not know
