

## Supplementary tables and figures

**Figure S1.** Mean monthly meteorological observations during 2018 and 2019.

**Supplementary Table S1** Treatment description of the present experiment.

Treatment abbreviation	Descriptions
ZTDSR <sub>R+</sub> : Zero-tillage direct-seeded rice with residue	Direct seeded rice in zero-tillage with 30% rice residue retention sown at 22.5 cm row spacing by happy seeder. All the pre-established weeds were controlled by pre-sowing application of glyphosate (41% EC).
ZTDSR: Zero-tillage direct-seeded rice	Same as above except residue retention.
CTDSR <sub>R+</sub> : Conventional-till transplanted rice with residue	Conventional tillage (2 dry harrowing + 2 wet tillage + 1 planking) direct seeded rice. 30% rice residues were kept in fields.
CTDSR: Conventional-till transplanted rice	Same as CTDSR <sub>R+</sub> except residue retention.
PTR <sub>R+</sub> : Puddled transplanted rice with residue	Conventional rice transplanting with a row spacing of 20 cm and hill to hill spacing of 15 cm. 30% rice residues incorporated in plots.
PTR: Puddled transplanted rice	Same as PTR <sub>R+</sub> except residue retention.

R<sub>+</sub>: Residue retention (30%)
