

Table S6: Recovery assets of the bioremediation treatments after initial investment recovery. The abbreviations as following; BA, bioaugmentation, with the addition of five hydrocarbonoclastic strain; BAV, bioaugmentation with the addition of permanent air venting; BE1 and BE4, biostimulation with the addition of compost in two different ratios, 9:1 (v/v) and 3:2 (v/v), respectively; and BAE, the combination of bioaugmentation and biostimulation, using a mixture of soil and compost with 3:2 (v/v) ratio.

Year	BE1		BE4		BAE		BA		BAV	
	Treatment	per m ³ of treated soil	Treatment	per m ³ of treated soil	Treatment	per m ³ of treated soil	Treatment	per m ³ of treated soil	Treatment	per m ³ of treated soil
