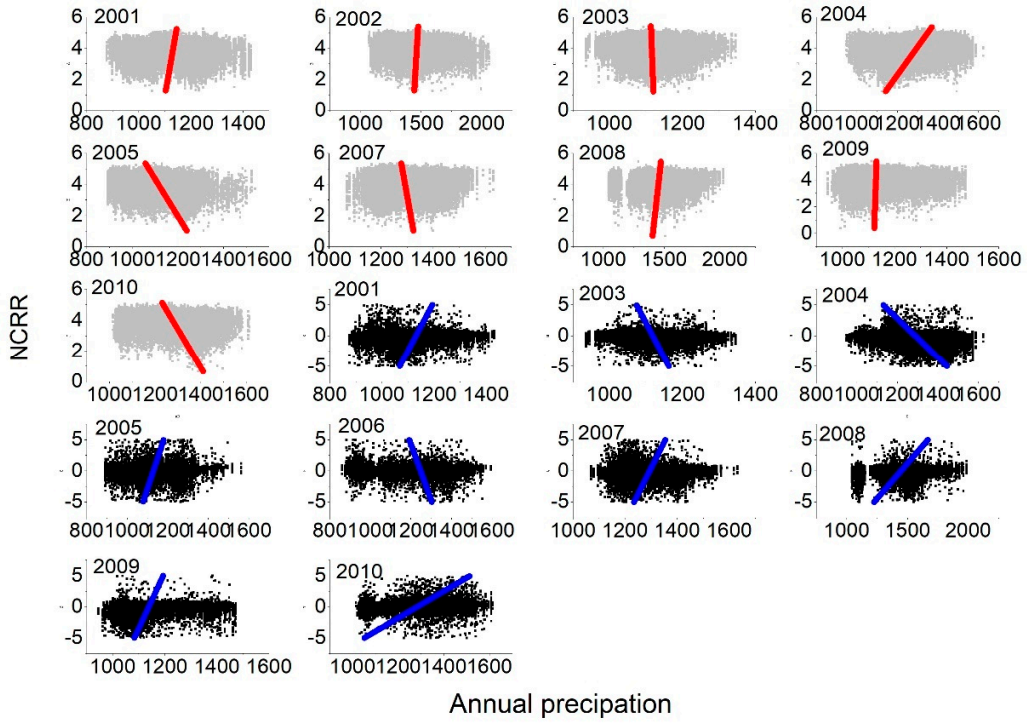

Figure S1. Relationships between seasonal greenness (SG), annual relative greenness (ARG) and annual precipitation during the period 2001-2010. We related annual precipitation to SG and ARG by the linear model. The grey square represents SG; the black square represents ARG; the red and blue line represents the tendency of SG and ARG, respectively.

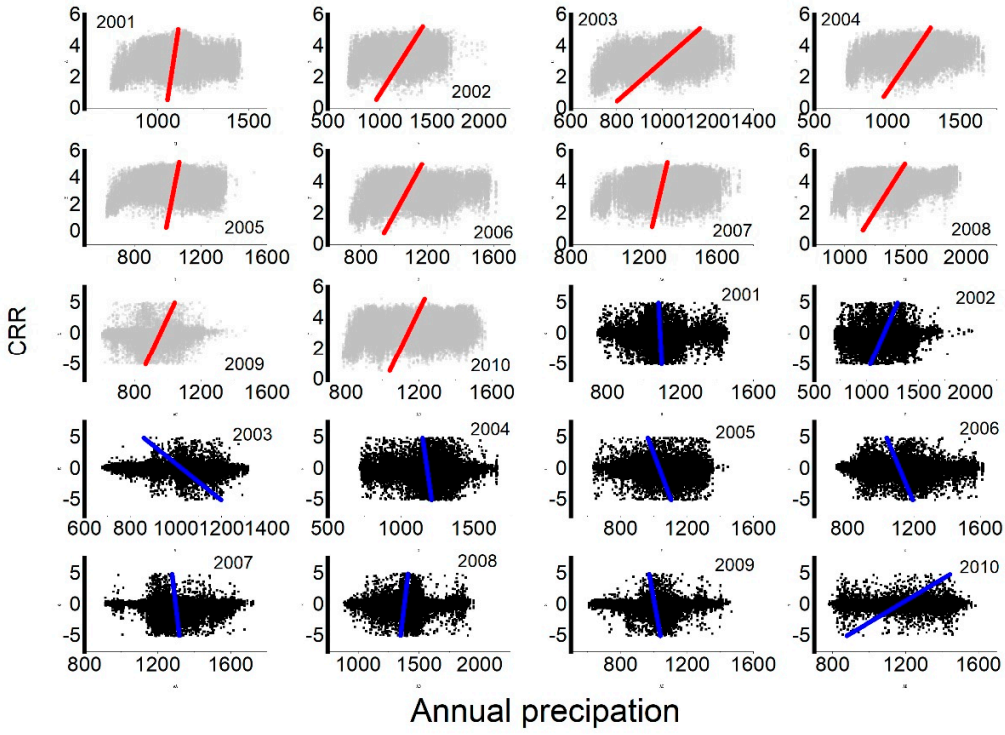

CRR
Annual precipation
2001
2002
2003
2004
2005
2006
2007
2008
2009
2010

Figure S2. Comparing the slope of the linear model of the SG and AGR between NCRR and CRR, we linked the SG and AGR with annual precipitation by a linear model.
