The authors would like to make the following corrections to the published paper [1]. The changes are as follows:

1. Text Correction

There were some errors in the original publication. Some words in the “Introduction” and “Results” are missing.

(1) Two corrections have been made to Section 1, “Introduction”, Paragraph 3:

In previous studies, scholars have assessed the impact of SARS and other shocks on subsequent tourism development [6,7].

They argued, inter alia, that the crisis has a pandemic tendency and will bring a decline in the economy and tourism over a period of time through normative rather than empirical analysis [13–15].

(2) A correction has been made to Section 1, “Introduction”, Paragraph 4:

However, how to quantify the treatment effects from the perspective of the tourism economy in such a short period of time remains an open question to be further explored and one that is rarely addressed in the existing literature.

(3) A correction has been made to Section 3, “Results”, Paragraph 1:

In this section, according to Function (2) and Function (3), the results are estimated by applying the shape RDD regression.

2. References

Reference 15 was mistakenly introduced into this article. To avoid confusion for readers and improve the rationality of relevant literature, the authors would like to replace Reference 15 with:

Škare, M.; Soriano, D.R.; Porada-Rochoń, M. Impact of COVID-19 on the Travel and Tourism Industry. *Technol. Forecast. Soc.* **2021**, *163*, 120469. <https://doi.org/10.1016/j.techfore.2020.120469>.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
