## a. Formulas of related landscape indices

The related landscape indices including mean area (MA), largest patch index (LPI), patch density (PD), edge density (ED), cohesion index (COHESION), division index (DIVISION), splitting index (SPLIT), and aggregation index (AI) are calculated as follows (Equations (1)–(8)):

$$MA = \frac{\sum_{j=1}^n a_{ij}}{n_i}, \quad (1)$$

where  $a_{ij}$  is the area of patch  $ij$  (ha), and  $n_i$  is the number of patches of type  $i$ .

$$LPI = \frac{\max_{j=1}^n (a_{ij})}{A} \times (100), \quad (2)$$

where  $a_{ij}$  is the area of patch  $ij$  ( $m^2$ ), and  $A$  is the total landscape area ( $m^2$ ).

$$PD = \frac{N}{A}, \quad (3)$$

where  $A$  is the total patches areas of each cultivated land type (100 ha), and  $N$  is the number of patches of each cultivated land type.

$$ED = \frac{\sum_{k=1}^m (e_{ik})}{A} \quad (4)$$

where  $e_{ik}$  is the total patches length of type  $i$ , and  $A$  is the total patches areas of each cultivated land type (ha).

$$COHESION = \left[ 1 - \frac{\sum_{j=1}^n p_{ij}}{\sum_{j=1}^n p_{ij}\sqrt{a_{ij}}} \right] \times \left[ 1 - \frac{1}{\sqrt{Z}} \right] \times (100) \quad (5)$$

where  $p_{ij}$  is the perimeter of patch  $ij$  in terms of the number of cell surfaces.  $a_{ij}$  is the area of patch  $ij$  in terms of the number of cells, and  $Z$  is the total number of cells in the Landscape.

$$DIVISION = \left[ 1 - \sum_{j=1}^n \left( \frac{a_{ij}}{A} \right)^2 \right], \quad (6)$$

where  $a_{ij}$  = area ( $m^2$ ) of patch  $ij$ . and  $A$  is the total landscape area ( $m^2$ ).

$$\text{SPLIT} = \frac{A^2}{\sum_{i=1}^m \sum_{j=1}^n a_{ij}^2}, \quad (7)$$

where  $a_{ij}$  is the area ( $\text{m}^2$ ) of patch  $ij$ , and  $A^2$  is the total landscape area ( $\text{m}^2$ ).

$$\text{AI} = \frac{m_{ii}}{\max m_{ii}} \quad (8)$$

where  $m_{ii}$  is the number of like adjacencies (joins) between pixels of patch type (class)  $i$  based on the single-count method.  $\max m_{ii}$  is the maximum number of like adjacencies (joins) between pixels of patch type.
