In this supplementary material, all the Swarm tracks that present any anomaly in at least one of the components of the geomagnetic field are reported.

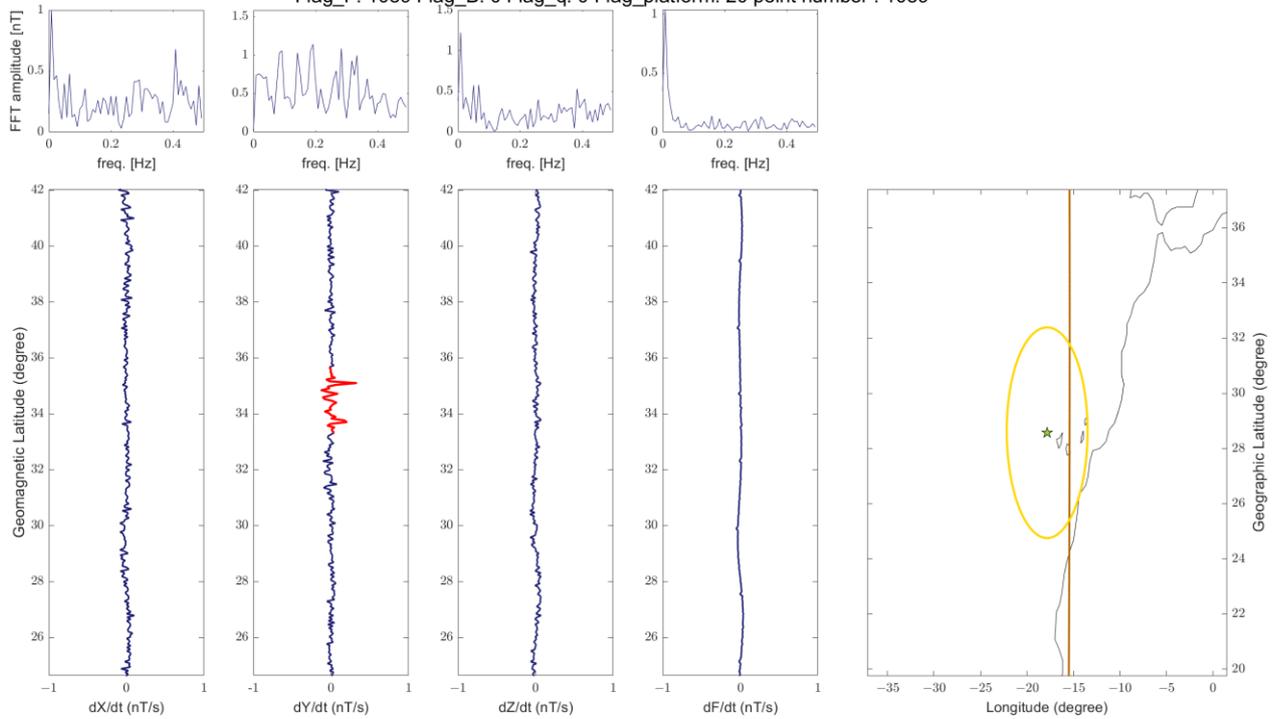

The anomalous window (defined as explained in Appendix B of the main manuscript) is red-coloured.

The title of each figure reports the satellite (A = Alpha, B = Bravo, C = Charlie), the track number, the mean Local and UT Time at the track centre and the geomagnetic condition. The residuals for X, Y, and Z components and scalar F are reported and a map showing the track projection on the satellite is shown on the right with brown color if Flags are okay or red if some Flags underline some unusual operating conditions. On the second line of the title is also reported the total sum of anomalous flags for Absolute Scalar Magnetometer (ASM, Flag_F), Vector Field Magnetometer (VFM, Flag_B), attitude data (Flag_q) and for the overall status of the spacecraft platform (Flag_platform). The total number of points is also reported.
