Table SM1. Spatial counts for endangered site buffers in the Cholistan Desert (algorithm last date set to 04/11/2022).

Endangered area		Endangered levels	
Yes	158	Extreme	20
No	179	High	29
Total	337	Moderate	36
		Low	73

Year	First impact	Last impact	Most occurrence
2017	56	1	37
2018	13	6	14
2019	19	2	11
2020	22	3	20
2021	17	5	22
2022	31	141	54
