Supplementary Online Material 6

Proximity analyses of threats and pressure

This supplementary material presents an analysis of threats and pressures in wetlands, along with their corresponding distances.

Anthropogenic threats and pressures

Figure S1 presents the cumulative percentage of wetland coverage as a function of distance from different anthropogenic threats and pressures to the wetlands map, highlighting the 80% thresholds of the percentage of wetland in the analyses.

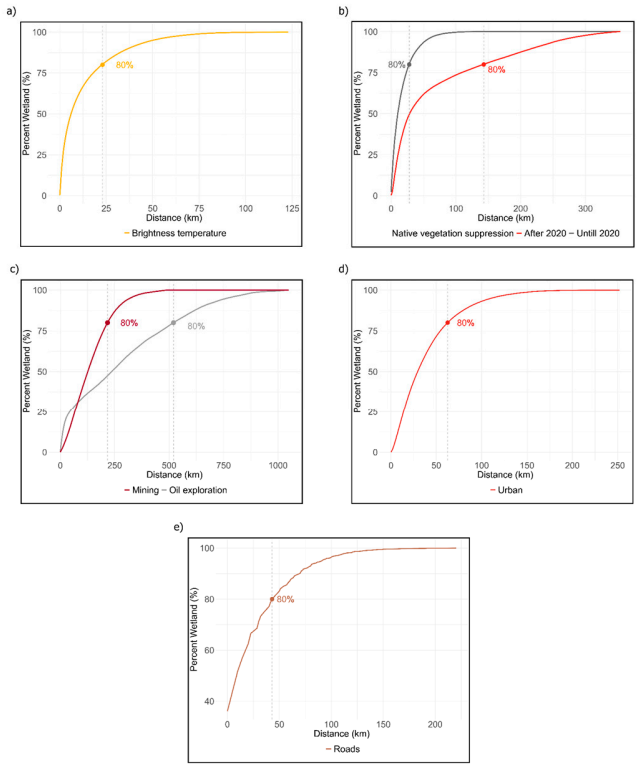

Figure S1. Anthropogenic threats and pressures on wetlands map

The threat database used in the distance analyses is presented in Table S1, along with its corresponding period.

Table S1. Threats database

Data	Datasource	Period
Fires	NASA VIIRS Land Science Team	2020
Native vegetation suppression	Imazon, Mapbiomas and RAISG	1985 - 2020
Mining	MapBiomas	1985 - 2020
Oil exploration	RAISG	2020
Urban	MapBiomas	2020
Roads density	Imazon	2020
