

Figure S1. Average Parent Reported Stool Frequency Among Infants in the Randomised Groups^{1, 2, 3}.

¹ All subjects treated population and Breastfed Reference

² Mann-Whitney test was used for comparison between the Test and Control groups (V1: $P = 0.893$; V2: $P = 0.708$; V3: $P = 0.372$; V4: $P = 0.690$; V5: $P = 0.986$)

³ Number of subjects per group for Test, Control, and Breastfed group, respectively – V1: $n = 103/99/59$; V2: $n = 100/97/59$; V3: $n = 94/89/59$; V4: $n = 90/87/56$; V5: $n = 90/87/56$.
