<sup>\*\*</sup> Any paper with 3 or more 'some concerns' was determined to be high risk of bias \*\* **KEY:** 

• Low risk of bias

? Some concerns

High risk of bias

<sup>&</sup>lt;sup>1</sup> Sterne J, Savovic J, Page M. RoB 2: a revised tool for assessing risk of bias in randomised trials. BMJ.

Domain 1 – Risk of bias arising from the randomisation process

Domain 2 – Risk of bias due to deviation from the intended intervention (effect of assignment to intervention)

Domain 3 – Missing outcome data

Domain 4 – Risk of bias in measurement of the outcome

Domain 5 – Risk of bias in selection of the reported result
