

Figure S1. The effect of a POCTA diet on liver triglycerides in mice fed a standard diet (SD), high fat diet (HFD) or a diet supplemented in olive pomace oil with high concentration in triterpenic acids (POCTA). Values are mean \pm SEM (n =5-10) and are normalized relative to the control group. ***P<0.001 vs SD; ###P<0.001 vs HFD.
