ND: normal diet; AD: atherogenic diet; Con: normal Krebs; 20mM: 20mM glucose Krebs; 40mM: 40mM glucose Krebs; 2hr: 2 h incubation; AUC: area under the curve; d: Cohen's d; n = number of rabbits.

Statistical significance (p) and effect size (Cohen's d) in comparison to the control group for each diet.

*p < 0.05 vs control.
