

Supplementary Table S1 Primers used for the real-time reverse transcription polymerase chain reactions.

	Forward	Reverse
<i>Ileal L cell function</i>		
NeuroD	5'-CTTGGCCAAGAAGACTACATCTGG-3'	5'-CGTGTTTGAAAGAGAAGTTGCC-3'
NGN3	5'-AAGAGCGAGTTGGCACTCAGC-3'	5'-AAGCTGTGGTCCGCTATGCG -3'
PPAR β/δ	5'-ACTTGGCGTGGCGCCTGC-3'	5'-AGCGGTGTGGGTATGCGCA-3'
PGCG	5'-ATTGCCAAACGTCATGATGA-3'	5'-GGCGACTTCTTCTGGGAAGT-3'
PC1/3	5'-AGACAGCATTACACCATCTCTA-3'	5'-AGAACAATTCTCTGCATACCAAGGT-3'
GPBAR1	5'-AACGCTACATGGCAGTGTG-3'	5'-GGAGGCCATAAACTTCCAGGTAGA-3'
GPR43	5'-GGGATCTGGGTACATGCTTAT-3'	5'-ATGTCAGACAGACGGGTACCAA-3'
<i>Reference</i>		
TFIIB	5'-ACCAGCCGTTTGGATGCTC-3'	5'-CCCACATCAATAACTCGGTC-3'

NeuroD, neurogenic differentiation factor; NGN3, neurogenin 3; PPAR β/δ , peroxisome proliferator-activated receptor β/δ ; PGCG, proglucagon, PC1/3, prohormone convertase 1/3; GPBAR1, G-protein-coupled bile acid receptor 1; GPR43, G-protein-coupled receptor 43; TFIIB, transcription factor II B.

Supplementary Table S2 Body weight gain, food intake, and food efficiency ratio (2nd Exp)

	Control	HGB
Initial weight (g)	20.1±0.3	20.1±0.3
Final weight (g)	41.3±1.5	43.6±0.8
Body weight gain (g/d)	0.20±0.01	0.22±0.01
Food intake (g/d)	2.89±0.04	2.89±0.05
Food efficiency ratio (%)	6.78±0.37	7.51±0.18

Values are means ±standard error of the mean (SE), n=8. HGB; high β -glucan barley.

Supplementary Table S3 Weight of organs (2nd Exp)

	Control	HGB
Liver (g)	1.59±0.17	1.54±0.12
Cecum with digesta (g)	0.22±0.01	0.26±0.01*
Retroperitoneal fat (g)	0.93±0.07	1.08±0.04
Epididymal fat (g)	2.11±0.14	2.38±0.15
Mesenteric fat (g)	0.95±0.18	1.20±0.09

Values are means ±standard error of the mean (SE), n=8.

Means with suffixed superscript letters differ significantly (Student's t-test, * $p < 0.05$ vs. control). HGB; high β -glucan barley.

(a)

(b)

Supplementary Figure S1. Representative GLP-1 staining of cells from the ileum. (a) Control, (b) HGB, staining of GLP-1 positive cells (highlighted by arrows). $\times 200$ magnification (one side length; $500\mu\text{m}$)
HGB; high β -glucan barley.
