TABLE S1. REE Prediction Equations

Mifflin-St. Jeor

Men:

$$\text{REE} = 10 \times \text{weight (kg)} + 6.25 \times \text{height (cm)} - 4.92 \times \text{age (y)} + 5.$$

Women:

$$\text{REE} = 10 \times \text{weight (kg)} + 6.25 \times \text{height (cm)} - 4.92 \times \text{age (y)} - 161.$$

Harris-Benedict

Men:

$$\text{REE} = 66.47 + 13.75 \times \text{weight (kg)} + 5.0 \times \text{height (cm)} - 6.75 \times \text{age (y)}.$$

Women:

$$\text{REE} = 665.09 + 9.56 \times \text{weight (kg)} + 1.84 \times \text{height (cm)} - 4.67 \times \text{age (y)}.$$

WHO

Men:

$$\text{If } 18-30 \text{ (y); REE} = 15.4 \times \text{weight (kg)} - 27 \times \text{height (m)} + 717.$$

$$\text{If } 31-60 \text{ (y); REE} = 11.3 \times \text{weight (kg)} + 16 \times \text{height (m)} + 901.$$

$$\text{If } >60 \text{ (y); REE} = 8.8 \times \text{weight (kg)} + 1,128 \times \text{height (m)} - 1,071.$$

Women:

$$\text{If } 18-30 \text{ (y); REE} = 13.3 \times \text{weight (kg)} + 334 \times \text{height (m)} + 35.$$

$$\text{If } 31-60 \text{ (y); REE} = 8.7 \times \text{weight (kg)} - 25 \times \text{height (m)} + 865.$$

$$\text{If } >60 \text{ (y); REE} = 9.2 \times \text{weight (kg)} + 637 \times \text{height (m)} - 302.$$

Oxford

(A conversion factor of 238.846 was added to convert MJ/day to kcal/day.)

Men:

$$\text{If } 18-30 \text{ (y); REE} = 0.0669 \times \text{weight (kg)} + 2.28$$

$$\text{If } 31-60 \text{ (y); REE} = 0.0592 \times \text{weight (kg)} + 2.48$$

$$\text{If } >60 \text{ (y); REE} = 0.0563 \times \text{weight (kg)} + 2.15$$

Women:

$$\text{If } 18-30 \text{ (y); REE} = 0.0546 \times \text{weight (kg)} + 2.33$$

$$\text{If } 31-60 \text{ (y); REE} = 0.0407 \times \text{weight (kg)} + 2.90$$

$$\text{If } >60 \text{ (y); REE} = 0.0424 \times \text{weight (kg)} + 2.38$$

Table S2. Clinical Characteristics and Comorbidities

	Control (n=20)	Asthma (n=41)	<i>P</i> value
Doctor diagnosis of asthma	0 (0)	41 (100)	<0.01
Pre- vs. post-puberty onset		19 (46) vs. 22 (54)	
Smoking history	7 (35)	10 (24)	0.54
Nasal polyp	0 (0)	11 (27)	0.01
Chronic or recurrent sinusitis	1 (2)	10 (24)	0.08
Pneumonia history	4 (20)	18 (44)	0.09
Bronchitis history	10 (50)	32 (78)	0.04
Emphysema or COPD	0 (0)	1 (2)	1.00
Snoring	9 (45)	14 (34)	0.57
Breathing sleep disorder	2 (10)	6 (15)	1.00
Allergy	7 (35)	33 (80)	0.04
Hypertension	0 (0)	3 (7)	0.54
Chronic Kidney Disease	0 (0)	1 (2)	1.00
Post Menopause	2 (10)	7 (17)	1.00

Data are n (%)

P values denoted the comparison between healthy control and asthmatic population as analyzed by Fisher Exact Test. COPD, chronic obstructive pulmonary disease.

Table S3. Asthma Control Test (ACT) Score of Patients with Asthma

Test Component	Mean $\pm$ SD
Missing work due to asthma	4.4 $\pm$ 0.9
All of the time – n (%)	1 (2)
Some of the time – n (%)	5 (12)
A little of the time – n (%)	9 (22)
None of the time – n (%)	26 (63)
Shortness of breath	4.0 $\pm$ 1.0
More than once per day – n (%)	2 (5)
Once per day – n (%)	1 (2)
3 – 6 times per week – n (%)	6 (15)
Once or twice a week – n (%)	20 (49)
Not at all – n (%)	12 (29)
Sleep disturbances due to asthma	4.3 $\pm$ 1.0
4 or more nights a week – n (%)	1 (2)
2 – 3 nights a week – n (%)	4 (10)
Once a week – n (%)	3 (7)
Once or twice a week – n (%)	11 (27)
Not at all – n (%)	22 (54)
Necessity to use rescue medication	3.7 $\pm$ 1.4
3 or more times per day – n (%)	4 (10)
1 – 2 times per day – n (%)	7 (17)
2 – 3 times per week – n (%)	4 (10)
Once a week or less – n (%)	8 (20)
Not at all – n (%)	18 (44)
Self-assessment of asthma control	4.1 $\pm$ 0.9
Poorly controlled – n (%)	2 (5)
Somewhat controlled – n (%)	9 (22)
Well controlled – n (%)	13 (32)
Completely controlled – n (%)	17 (41)
Total ACT Score	20.4 $\pm$ 4.4
Subject with ACT score $\leq$ 19 – n (%)	12 (29)

The Asthma Control Test Score was assessed over the past 4 weeks prior to exam.

Table S4. Asthma-related Medications

Medications	Asthma (n=41)
Short Acting Beta Agonist – n (%)	29 (71%)
Short Acting Muscarinic Agonist – n (%)	1 (2%)
Inhaled steroids – n (%)	24 (58%)
Fluticasone/propionate – n	2
Fluticasone/salmeterol – n	5
Mometasone – n	5
Budesonide/formoterol – n	5
Mometasone/formoterol – n	5
Budesonide – n	2
Oral steroids – n (%)	2 (5%)
Biologicals – n (%)	4 (10%)
Omalizumab – n	1
Mepolizumab – n	2
Benralizumab – n	1
Long acting muscarinic antagonist – n (%)	2 (5%)
Tiotropium – n	1
Aclidinium – n	1
Leukotriene Modifier – n (%)	15 (37%)
Montelukast – n	15

TABLE S5. Detail Summary Statistics for REE prediction model

Model 1 – using previously known criteria (age (years), sex (male=1; female=0), fat mass (kg) and fat free mass (kg))						
Regression Statistics						
Multiple R	0.763					
R square	0.583					
Adjusted R square	0.552					
Standard Error	225.891					
Observations	60
