Values are presented as the mean ± standard deviation (SD). ^a Analyzed by a paired *t*-test between T0 and T8 within each group. ^b Analysis by an independent *t*-test for change value between the groups. Δ (delta) represents changed values (the change from T0 at T8). IFN: interferon. Ig: immunoglobulin. IL: interleukin. SQ: Sil-Q1. TNF: tumor necrosis factor. T0: baseline. T8: follow-up.
