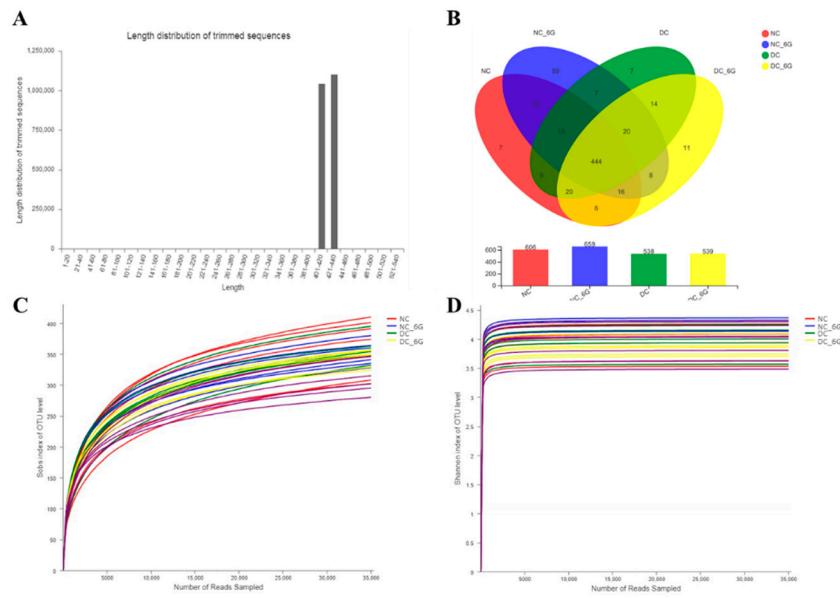

Figure S1. DNA raw data and comparison of the OTUs of intestinal bacteria of mice (A) DNA sequencing number and length; (B) A Venn diagram was generated to describe the common and unique OTUs among the 4 groups; (C)The rarefaction curves; (D) The shannon curves of samples. NC, normal control group; NC+6G, normal mice treated with 6-gingerol; DC, prediabetic control group; DC+6G, prediabetic mice treated with 6-gingerol.
